FOREWORD BY THE MEC

The Estimates of Capital Expenditure (ECE) presents government's intervention in the delivery of critical socio-economic infrastructure. Over the 2018/19 MTEF, government is setting aside R38billion for infrastructure development, upgrade and maintenance. Within the current context of fiscal constraints and consolidation, as government we are increasingly prioritising the maintenance of existing infrastructure. This does not mean that government will ignore the parts of our Province that do not have socio-economic infrastructure; in fact 36% of the capital budget is for development of new capital infrastructure. It is government's aim to utilize the infrastructure to bring social services to communities as well as to unlock economic opportunities.

The Infrastructure Delivery Management System (IDMS) which was adopted by the KZN Provincial Government in 2012 clearly articulates our approach in terms of planning, budgeting and reporting on infrastructure. We have made great strides in improving planning for infrastructure delivery. This publication of a detailed list of infrastructure projects that will be delivered over the MTEF clearly demonstrates our commitment towards proper planning and budgeting for infrastructure. For the first time we are showing infrastructure budgets per district to ensure that there is focused attention on areas of greatest need.

We will not just plan and budget for infrastructure but will also monitor the implementation through monthly reports using the In-Year Reporting Model (IRM). We will also conduct physical inspections periodically and end of year evaluations of infrastructure projects delivered. One of the areas that we will continue to improve on is assessing value for money i.e. efficiency in the delivery of the infrastructure programme.

It is my pleasure to present the ECE which has two major sections. The first section of the publication presents the overall summary as well as the principles for infrastructure planning and budgeting. The second part of this publication presents infrastructure budgets and plans per department. The final section is the annexure which contains a list of all infrastructure projects per vote and per district. The detailed list of infrastructure projects provides the Provincial Legislature with a tool to hold government departments accountable for rolling out infrastructure projects. It also provides a useful source document to the people of KZN to understand the plans that government plans to roll out in their localities.

Ms B.F. Scott

DEFINITIONS

I. Infrastructure Nature of Investments Classifications

• Existing Infrastructure Assets

For existing infrastructure assets, there are three types of classifications available as follows:

- *Upgrades and additions*: includes activities aimed at improving the capacity and effectiveness of an asset above that of the intended purpose. The decision to upgrade an asset level above its original level/grade or increase the asset size through additions is a deliberate investment decision which may be undertaken at any time and is not dictated by the condition of the asset, but rather in response to a change in demand and/or change in service requirements. Spending under this classification is of a capital nature.
- *Renewal (rehabilitation and refurbishment)*: includes activities that are required due to the condition of the asset, which may be due to neglect or unsatisfactory maintenance or degeneration of an asset. The action implies that the asset is restored to its original condition, enhancing the capacity and value of an existing asset that has become inoperative due to the deterioration of the asset. Spending under this classification is of a capital nature. Depending on the severity of the condition of the asset, the option of demolish and replace may be a preferred option. In all determinations, value for money, affordability and future lifecycle costs should be part of the assessments.
- *Maintenance and repairs*: all actions intended to ensure that an asset performs a required function to a specific performance standard(s) over its expected useful life by keeping it in as near as practicable to its original condition. Includes activities aimed at maintaining the capacity and effectiveness of an asset at its intended level. The maintenance action implies that the asset is restored to its original condition and there is no significant enhancement to its capacity or the value of the asset. The Maintenance Programme is subdivided into:
 - Preventative Maintenance (slows deterioration or reduce possibility of failure)
 - Corrective Maintenance (breakdowns/failures)Spending under this classification is of a current nature.

• New Infrastructure Assets

A department may purchase or construct a completely new infrastructure asset that is not part of any existing infrastructure asset. The expenditure incurred is capital in nature and should be classified under new infrastructure assets.

• Infrastructure Transfers

Infrastructure transfers can be either capital in nature or current in nature.

- *Infrastructure transfers capital*: this category is relevant when the department makes a transfer of funds that the beneficiary must use either for the construction of new infrastructure or for upgrades/additions to capital or refurbishment/rehabilitation of existing infrastructure.
- *Infrastructure transfers current*: this category is relevant when the department makes a transfer of funds to an entity to cover administrative payments relating to the construction of infrastructure, such as conducting a feasibility study in the construction of a new office building. Administrative costs directly relating to the infrastructure project will only be capitalised once the decision has been made to construct the infrastructure. Therefore records of such costs should be maintained until the final decision on the project is made.

- **Infrastructure leases**

This category caters for both finance leases and operating leases. The category is used to classify the monthly repayment as per the lease agreement.

- **Non-infrastructure**

This category is specifically for spending that is not directly related to the construction or purchase of infrastructure assets. Such spending can be either of a current or capital nature. For non-infrastructure assets, there are three types of classifications available:

- *Non-infrastructure: current.* This category includes payments relating to stand-alone purchases of goods and services, as well as purchases of goods and services relating to the maintenance and repair of a non-infrastructure asset. It also includes payments relating to non-infrastructure projects of a current nature other than maintenance projects. However it is important to note that assets (major) bought into a current project should be recorded as “stand-alone capital assets”.
- *Non-infrastructure: capital.* This category caters for the purchase of stand-alone capital assets and for projects for the creation of new and/or the upgrading, rehabilitation or refurbishment of existing non-infrastructure assets as well as other non-infrastructure projects of a capital nature.
- *Non-infrastructure: leases.* This category caters for both finance and operating leases and is used to classify the monthly payments as per the lease agreement.

II. Budget Programmes

The budget programme structure defines a budget structure centred on results and outcomes. The organisational structure defines how a department is organised into an efficient and effective functioning system to achieve those same results and outcomes.

(Source: Refer to National Treasury document “Guidelines on Budget Programmes – June 2010 Update”)

- A *budget programme* is a main division within a department’s budget that funds a clearly defined set of objectives based on the services or functions within the department’s legislative and other mandates. It also constitutes a management unit established within a department responsible for the delivery of that defined set of services and functions. While the term “programme” is often loosely used in many situations, in these guidelines the use of “programme” is confined to the functional divisions created within the context of the budget and designated as a “programme” in the budget estimates, that is, main division in terms of Section 27(3)(b) of the PFMA.
- A *sub-programme* is a constituent part of a programme, that defines the services or activities which contribute to the achievement of the objective(s) of the programme of which it forms a part. Some of the defined services or activities could include key projects identified by a department.

III. Effective Infrastructure Planning

The benefits arising from effective infrastructure planning and budgeting include:

- Greater certainty in terms of budget allocation and utilisation as more accurate longer-term projections benefit all role players within the infrastructure delivery sector, given that infrastructure provision is a major source of employment;
- Improved alignment of Service Delivery with Infrastructure Plans;
- Increased ability to deal with unexpected demands (both physical and financial);
- Better financial planning, certainty and accountability;
- More efficient utilisation of limited human resources such as scarce skills; and
- Strategic utilisation of limited resources, achieving a balance between providing new infrastructure and ensuring existing infrastructure remains fit for purpose while ensuring efficient utilisation.

IV. Infrastructure Plans

• User Asset Management Plan (U-AMP)

The purpose of the Government Immovable Asset Management Act, 2007 (GIAMA), is to ensure a uniform framework for the management of immovable assets in government and to ensure that assets support delivery objectives of the department. GIAMA makes it incumbent on national & provincial departments to promote public service delivery objectives through the sound management of assets used or controlled. The minimum contents required in terms of section 8 of GIAMA for the User Immovable Asset Management Plan (U-AMP) consists of at least:

- A strategic needs assessment;
- An acquisition plan;
- An operations plan; and
- An immovable asset surrender plan.

The process of compiling a U-AMP is integral to the strategic planning process in that the availability of immovable assets facilitates the achievement of service delivery objectives. It is therefore required to integrate immovable asset planning into the department's strategic planning process. This is achieved by linking assets with programme delivery strategies and objectives during the compilation of corporate strategic plans. The immovable asset time frame should equate with the Medium Term Expenditure Framework (MTEF) and is aligned with the corporate planning horizon. By incorporating immovable asset planning into the strategic planning framework (and MTEF) the long-term implications of corporate level decision-making on immovable assets can be identified and appropriate responses developed.

• Custodian Asset Management plan (C-AMP)

The Custodian, in line with the prescripts the Public Service Act, 1994 and GIAMA, should determine a portfolio strategy for the immovable assets under its control. The purpose of the portfolio strategy is to determine a prioritisation framework for the improvement and management of the immovable assets. Such a portfolio strategy should take cognisance of national and provincial development strategies, adhere to the key principles of GIAMA and should also reflect on specific issues such as:

- Sustainability of the portfolio from a financial perspective, taking account of amongst others heritage obligations, environmental impact, occupational health & safety and energy imperatives;
- Macro-economic factors, Property and Construction Industry Development Programmes (with reference to broad-based black economic empowerment and contractor development) and prevailing and projected market factors in the context of finding a balance between new investments in state-owned immovable assets, public private partnerships and leasing from the private sector; and

- The rationale and cost of holding investment assets or disposing of surplus immovable assets.

The Provincial C-AMP must respond to the needs of the Provincial Departments as identified in the U-AMPs. The C-AMP will not include roads. The templates as prescribed by the National Department of Public Works will be utilised. As a minimum the following must be included in the C-AMP:

- Indication of how integrated provincial infrastructure delivery responds to needs identified in U-AMPs;
- Indication of the Provincial Asset Management Strategy and Priorities;
- Synopsis of the performance of Immovable Assets;
- Lifecycle Maintenance Plans with budgetary requirements;
- Acquisition Plan with budgetary requirements;
- Disposal Plan with budgetary requirements;
- Property Development plan with budgetary requirements; and
- Description of the system that will be used to monitor and evaluate

● **Infrastructure Programme Management Plan (IPMP)**

The IPMP is a natural succession from the U-AMP with respect to highlighting the infrastructure programmes and projects that will be executed, monitored and controlled over the planned MTEF period. The purpose of the IPMP is to:

- Establish arrangements for the efficient and effective management of the Client's infrastructure programme over the MTEF period;
- Align these with the adopted Construction Procurement Strategy (CPS);
- Indicate the allocation of the MTEF budget to the programmes and projects to be implemented over the MTEF period;
- Document to provide information on value for money; and
- Motivate stakeholders on the state of readiness (status of projects, resources available and programme management capacity) of the client department for the infrastructure delivery

If all or part of the implementation is assigned to one or more Implementers, the IPMP and CPS defines the scope, deliverables, targets and requirements of the sub-programmes assigned to specific Implementers.

● **Infrastructure Programme Management Plan (IPIP)**

The Infrastructure Programme Implementation Plan (IPIP) is the Implementer's response to the IPMP and sets out precisely how the Implementers intends complying with the IPMP in the implementation of the programme / projects allocated to it, specifically with respect to quality time, budget and scope. The IPIP is an implementation plan prepared by an Implementing Agent that is in response to the IPMP and specifies how it will execute, monitor and control the infrastructure programme allocated by the client. The purpose of the Infrastructure Programme Implementation Plan is to:

- Establish arrangements for the efficient and effective management of the Client's infrastructure programme over the MTEF period;
- Align these with the adopted construction procurement strategy; and
- Respond to the Clients IPMP with a Programme Implementation Plan (IPIP), which sets out precisely how the Implementer intends complying with the Programme Management Plan in the implementation of the programme / projects allocated to it.

The Programme Implementation Plan cash flow should be submitted quarterly and it becomes the performance agreement (as part of the Agency Agreement) between the parties. The Programme

Implementation Plan is key resource document for the management of the programmes between the client and the Implementer.

- **Roads Asset Management Plan (RAMP)**

The RAMP is similar to the U-AMP but applies to all road asset categories.

EXECUTIVE SUMMARY

The Estimate for Capital Expenditure (ECE) publication for the 2018/19 MTEF provides detailed infrastructure expenditure plans for provincial departments. This publication is aiming at improving the infrastructure planning and contribute to ensuring effective and efficient delivery of infrastructure projects. ECE includes each provincial department's infrastructure development project lists planned to be delivered during the 2018/19 MTEF period. The Infrastructure projects list comprises construction of new, upgrading, repairs, additions, refurbishment, rehabilitation and maintenance of existing fixed asset base namely roads, bridges, administrative buildings, schools and hospitals to mention a few. The ECE also indicates the total provincial infrastructure budgets from different sources of funding. The total provincial infrastructure budget comprises of Equitable Share and conditional grants for infrastructure development over the 2018/19 MTEF period. Table 1 below illustrates the summary of Infrastructure budgets from the Equitable Share and Conditional grant funding.

Table 1 Provincial Revenue Source for Infrastructure

R thousand	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-term Estimates		
	2014/15	2015/16	2016/17				2017/18	2018/19	2019/20
Infrastructure receipts									
Equitable share	7 422 481	7 075 605	6 877 704	6 935 294	7 307 997	7 307 532	7 442 961	7 752 379	7 979 064
Conditional Grant	4 641 694	5 088 338	5 221 563	5 104 377	5 104 377	5 104 377	5 027 178	4 845 688	5 216 723
Total Infrastructure receipts	11 764 175	12 173 943	12 099 267	12 039 671	12 412 374	12 411 909	12 440 139	12 598 068	13 195 787
Growth rate									
Equitable Share Growth		-1%	-3%	1%	6%	6%	1%	5%	3%
Conditional Grant Growth		10%	2%	-2%	-2%	-2%	-2%	-4%	8%
Human Settlements Development grant	3 509 045	3 543 852	3 124 702	3 477 567	3 677 567	3 677 567	3 452 757	3 275 425	3 508 205
		1%	-12%	11%	8%	8%	-14%	4%	7%

As can be seen above, the Equitable Share shows a negative growth rate between the financial year 2014/15 and 2016/17 due to other pressures in the province which resulted in substantial cuts in the Department of Education as funds were move from infrastructure to fund other pressures. A positive growth is realised in 2017/18 as well as over the 2018/19 MTEF. The infrastructure conditional grants shows a steady growth from 2014/15 to 2016/1. Due to the fiscal consolidation and the need to fund other expenditure pressures that have arisen at national level, the grant was cut from 2017/18 to 2019/20. The outer years of the MTEF however shows a reasonable growth.

The Human Settlements Development Grant (HSDG) that is used for housing development has been separated from other infrastructure grants since it is utilised for buildings that are not owned by government but get transferred to beneficiaries. This grant shows a positive growth of 1% during 2015/16 financial year and a decrease of 12% as a result of once-off additional funding of R303.77 million from the NDHS for fast-tracking service delivery. Further growth from the Main to the Adjusted Appropriation is due to a second Adjustments Estimate in respect of an additional amount of R200 million received from NDHS in terms of Section 20 of the Division of Revenue Act (DORA). The reduction in 2018/19 MTEF relates to fiscal consolidation cuts and partly due to the creation of two new grants in the Human Settlement sector.

The Figure 1 presents a graphical comparison between the Equitable Share and Conditional Grant. Even though the provincial equitable portion has been contributing more than the conditional grant over the years, the growth rate is still minimal as compared to the conditional grant. The grants show a decreasing trend in the 2018/19 MTEF due to fiscal consolidation.

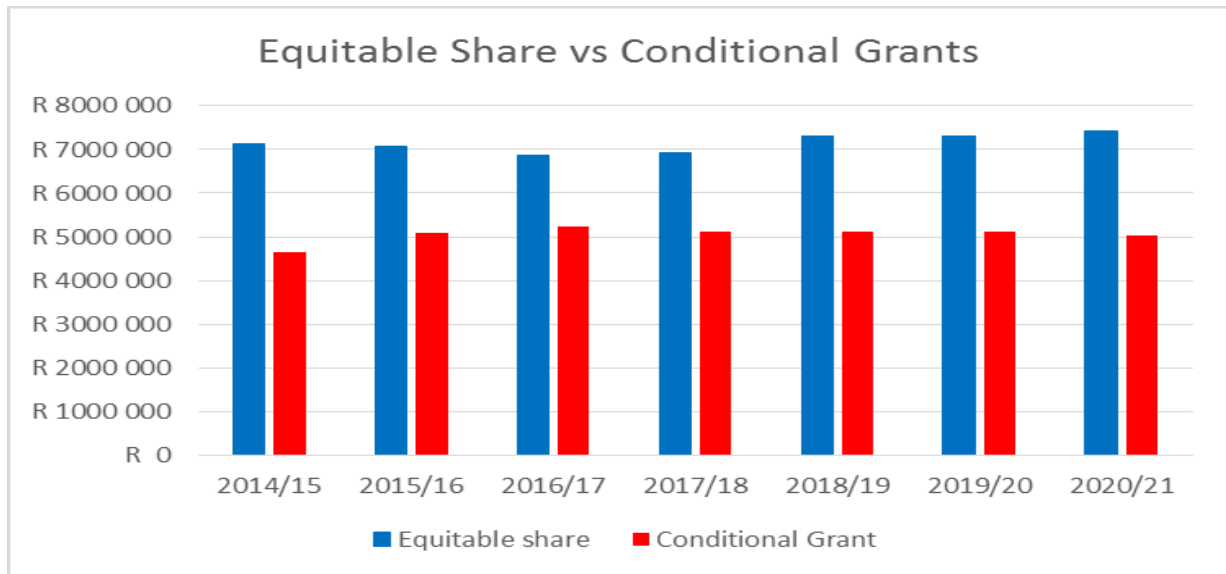

Figure 1: Equitable Share against Conditional Grant Funding (excluding the HSDG)

The table 2 shows allocations per department. The three departments namely Department of Transport, Education and Health receive a substantial portion of infrastructure budget. This has been the trend since 2014/15. The Department of Transport has the biggest portion of infrastructure budget followed by the departments of Education and Health respectively.

Table 2 Summary of Infrastructure Payments and Estimates by Vote

R thousand	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-term Estimates		
	2014/15	2015/16	2016/17				2017/18	2018/19	2019/20
1. Office of the Premier	10 049	2 271	18 189	5 034	11 147	11 147	20 502	20 115	20 564

12. Transport	6 506 106	6 674 684	6 765 474	6 846 738	7 071 984	7 071 984	7 108 198	7 293 849	7 721 672
13. Social Development	152 152	142 701	133 791	156 708	151 049	136 548	135 114	129 195	105 307
14. Public Works	108 762	80 325	50 557	67 282	61 446	55 046	61 139	70 406	71 506
15. Arts and Culture	56 466	88 771	98 151	162 864	109 803	109 803	182 324	176 872	133 656
Total	11 764 175	12 173 943	12 099 267	12 039 671	12 412 374	12 411 909	12 440 139	12 598 068	13 195 787

Note: HSDG is excluded in the table

The total infrastructure budget has maintained a positive growth until 2017/18 but a positive growth is shown in the outer years of the 2018/19 MTEF.

**OVERVIEW
OF
PROVINCIAL INFRASTRUCTURE
CAPITAL
EXPENDITURE**

1. Capital Expenditure Overview

1.1 Introduction

Each year National Treasury provides a “Budget Formats Guide for the Preparation of Estimates of Provincial Revenue and Expenditure (EPRE). The EPRE requires provincial infrastructure payments or estimates to be indicated by vote and must include transfers made for the delivery of provincial infrastructure. The EPRE submissions are aligned to the infrastructure delivery cycle submissions. Specifically for infrastructure planning preparations and refinements for the outer financial years are prepared and submitted through the following infrastructure plans:

- EPRE submission 1 User Asset Management Plan (U-AMP) and/or Road Asset Management Plan (RAMP) which is a minimum 10 years horizon that contains future infrastructure demands, committed multi-year projects and ongoing operational requirements of assets lifecycle costs;
- EPRE submission 2 Infrastructure Programme Management Plan (IPMP) and Procurement Strategy which stipulates what infrastructure projects and maintenance the client organisation intends to achieve in the MTEF period (i.e. the next 3 years) of implementation; and
- EPRE submission 3 (final) Infrastructure Programme Management Plan (IPMP) which is focused on preparing accurate MTEF infrastructure projects and maintenance cash-flow forecasts using the most recent expenditure performance. Particular focus is on year 1, where detailed monthly forecasts are prepared and the final estimates for the MTEF are captured in the project lists schedule (Table B5 from National Treasury).

Figure 2 below, depicts the timeline and outline of the 2017/18 planning and budgeting processes in preparation of 2018/19 MTEF.

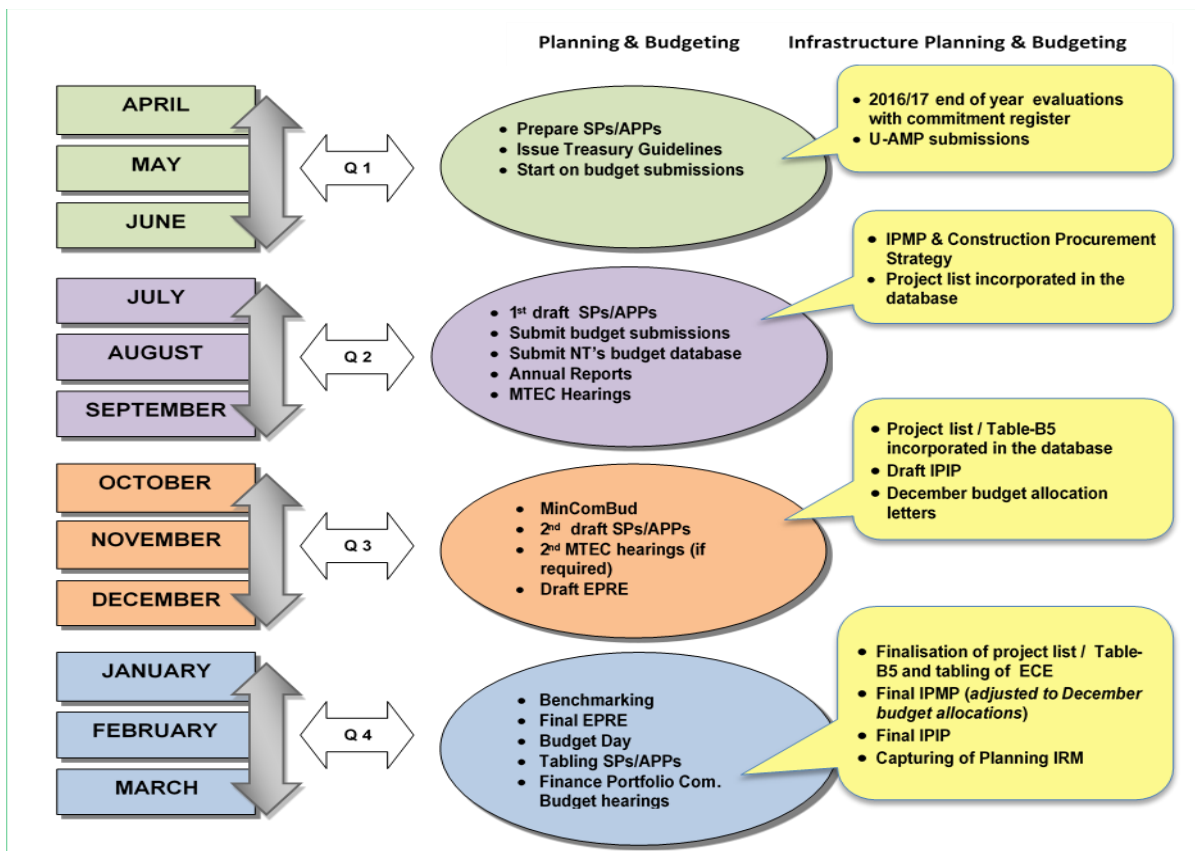

Figure 2: Equitable Share against Conditional Grant Funding (excluding the HSDG)

1.2 Review of Infrastructure Programme for the 2017/18 Financial Year

This section provides a review of 2017/18, outlining the main achievements and progress made by the departments, as well as providing a brief discussion on new developments with infrastructure delivery. The Province was affected by storms during the months of September and October 2017. The Departments of Health, Education and Transport were allocated an additional funding for the disaster. An additional financial commitment totalling R491.387 million has thus been allocated to the affected departments in the 2017/18 and 2018/19 financial years. This amount is disaggregated to Education, Health and Transport to the amount of R190.480 million, R100.900 million and R200 million respectively for the repairs of damaged infrastructure.

Education: The department completed Mandla Mthethwa Model high school in uMkhanyakude, Ulundi unit D primary school in Zululand, Mona primary school in Zululand, Indaleni secondary in uMgungundlovu, and Ubuhlenibenkosi Intermediate School in Zululand, Westmead secondary school in Pinetown. As part of ensuring that a conducive environment is created for teaching and learning, the department had successfully procured schools furniture for new schools completed in 2017/18 namely Mandla Mthethwa Model high school in uMkhanyakude district, Ulundi unit-D primary School and Mona primary school in Zululand district. On the category of Repairs and renovations, the department completed amongst others the following projects, Buhlebezwe primary school Ugu district, Mafahleni high school in uMgungundlovu district, Emkhamo combined school in uMzinyathi, Mpophoma primary school in uMzinyathi, Isibankwa primary school in uThukela, Enyaninsweni primary school in Ugu district. An additional amount of R50 million in the 2017/18 Main Appropriation was allocated from provincial cash resources for the improvement of water and sanitation in various schools, across the province. Schools that benefited amongst others are Gcinimfundo secondary in Ilembe district, Qalimfundo secondary in Ilembe, Senzokuhle primary in Ilembe, Mfushane, Ntandoyethu, Vikindlela and Bangumuzi primary in uMzinyathi, Hyman Primary in Ugu Mandlendoda and Mthimude primary, as well as Kwamasosha high school in Ugu. The employment of additional technical staff as part of the IDMS went a long way in addressing the challenges of problematic projects, long completion times, quality of completed work and the escalating costs of projects. The department uses three Implementing Agents to roll out the infrastructure programme. The bulk of the work is located to the Department of Works.

Health: There was a drive to address backlogs in fixed equipment maintenance (lifts, air-conditioners, chillers, boilers) in 2017/18. This relates to a more focused application of the DORA requirements for the Health Facility Revitalisation grant, which requires a 25 per cent allocation of the grant to maintenance. Projects include day-to-day maintenance at all facilities such as urgent unplanned reactive maintenance, planned maintenance, as well as servicing of plant, equipment, air conditioning and lifts. The major project for the Department in 2017/18 was the Dr. Pixley ka Seme Hospital which is in construction stage with anticipated completion in 2019/20. The department has fully implemented its revised infrastructure staffing structure that received funding from the Equitable Share. The Department also continues to recruit built environment specialists as per the IDMS structure that seeks to capacitate the Infrastructure unit. The October 2017 storms affected mainly the eThekweni health facilities. After the allocation of additional funding the Department put emergency measures in place to start repairs at Wentworth Hospital, King Edward VIII Hospital, Prince Mshiyeni hospital as well as the Provincial Pharmaceutical Supply Depot

Human Settlements: There are 30 projects under construction, and 10 of these should be completed and closed within the last quarter of 2017/18 under the Informal Settlement Eradication Strategy for 2011. To date, the department has experienced an invasion of 780 hectares of land and an anti-invasion strategy to limit land invasion is being implemented. This land is being developed as a new township in eThekweni (also known as a “green field” development) with a view to relocating residents of nearby informal settlements. To date, 1 235 houses have been delivered under this instrument. The strategic focus for the Integrated Residential Development Programme (IRDP) has been on the delivery of serviced sites. The

green field nature of the IRDP instrument allows for better planning for the availability of bulk services. Rural housing development delivery programme has delivered at a much faster pace than expected throughout all the districts. A total of 7 729 rural houses were delivered by the third quarter. It was originally projected that 7 764 units will be delivered by year-end, but the department is anticipating over-achievement in this regard.

Sport and recreation: The department developed 83 sport and recreation facilities in 2017/18, comprising three basic sport and recreation facilities as follows:

- 11 outdoor gyms;
- 11 combination courts;
- 11 kick-about sport facilities;
- 33 children's play gyms;
- 11 local hub centres; and
- 3 new resourced hub fitness centres.

The department also engaged municipalities, through the MUNIMEC, to maximise the utilisation of 15 per cent of the Maintenance Infrastructure Grant (MIG) for the construction and maintenance of sport and recreation facilities. The department also continued to support municipalities with the provision of maintenance equipment, as well as the appointment of 26 caretakers to manage, maintain and secure sport fields constructed by the department within municipalities.

Transport: The department continued to focus on road infrastructure development in rural areas. The following list details some projects that were completed and some that were in progress in 2017/18:

- Main Road P577, located from Duffs Road to KwaDabeka, comprising the construction of 16.5 kilometres was completed in 2017/18, and includes the Bus Rapid Transit (BRT) project;
- Main Road P700 corridor, located from Ulundi to Empangeni, comprising the upgrade of 93.5 kilometres from gravel to blacktop surface. Of this, 84.5 kilometres have been constructed to date, with five kilometres of blacktop surface constructed in 2017/18;
- Main Road P127, located from Impendle to Himeville, comprising the upgrade of 56 kilometres from gravel road to blacktop surface. To date, 32 kilometres have been upgraded, with three kilometres upgraded in 2017/18, as planned;
- Main Road P443 extends from the intersection with road P522/2 and P522/1, in the Ndumo area, and along the Swaziland border. The project entails the rehabilitation and upgrading of 23.26 kilometres (The road forms part of the Inkululeko development projects). The planned widening of the road shoulders, the blasting and widening of narrow sections, the construction of new a base layer and a black top weatherproof surfacing of 8 400 square metres were achieved in 2017/18; and
- The Mboza Pongola vehicle bridge which is a new bridge over the Pongola River. The bridge site is located in the uMhlabuyalingana Municipality, and was completed in 2017/18.

Social Development: The peak in expenditure in 2017/18 relates to various projects including the eThekweni Cluster office buildings (formerly known as the Government Garage building), as well as the Underberg service office. The increase maintenance projects over the 2017/18 MTEF highlights the department's efforts to improve the conditions of office buildings, as well as state facilities. Projects included in the plans for the MTEF are Umlazi and Ocean View places of safety and the Lower Umfolozi and Ndwedwe service offices. Under the category of Refurbishment and rehabilitation, the reprioritisation of funds from areas such as Machinery and equipment has been done in order to offset pressures from various projects in an effort to address the poor condition of the state facilities and service offices.

Public Works: The budget over the 2017/18 MTEF catered mainly for infrastructure projects such as:

- The sound proofing of the Mayville Conference Centre and conversion of an existing building on the premises into a dining facility;
- New canteen in the uMgungundlovu district office;

- Construction of the new CIBD offices in Newcastle;
- Upgrades to the workshop in the Vryheid district office;
- The continuation of the construction of a new district office in iLembe;
- Repairs of internal roads, parking facilities, emergency plumbing, ablution facilities and the irrigation scheme at the LA Complex in Ulundi;
- Construction of new parking area and extension of the existing parking area in the Southern regional offices;
- Upgrades of existing sheds in the eThekweni regional office;
- Upgrades of the Eshowe district office; and
- Refurbishment of the existing uMgungundlovu district office.

1.3 Infrastructure Budget per Nature of Investment

Infrastructure budget per nature of investment is an essential part of the infrastructure programme. It defines the services and activities which contribute to the achievement of the objective(s) of the programme. The specific allocation per nature of investments aligns to the strategic infrastructure objectives for each organisation. Table 3 shows the consolidated view of the Infrastructure budget per nature of investment for the province. A substantial amount of the infrastructure budget is allocated to the existing infrastructure assets for maintenance and repairs, upgrade and additions as well as refurbishment and rehabilitation from 2014/15 up to the current MTEF. This is followed by new infrastructure and transfers respectively, while the leases and non-infrastructure budget fluctuates over the years.

Table 3 Summary of infrastructure payments and estimates per nature of investment

R thousand	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-term Estimates		
	2014/15	2015/16	2016/17				2017/18	2018/19	2019/20
Existing infrastructure assets	8 319 239	8 296 870	8 146 915	8 125 526	8 770 200	8 720 393	8 049 159	8 495 160	9 065 118
Maintenance and repair: Current	2 432 806	2 137 625	2 836 496	3 736 639	3 707 618	3 700 019	3 344 884	3 481 050	3 689 395
Upgrades and additions: Capital	4 165 533	4 173 440	3 414 884	2 705 798	3 687 335	3 620 741	3 199 175	3 473 317	3 306 030
Refurbishment and rehabilitation: Capital	1 720 900	1 985 805	1 895 535	1 683 089	1 375 247	1 399 633	1 505 100	1 540 792	2 069 692
New infrastructure assets: Capital	1 638 042	1 757 868	1 861 223	2 266 954	1 880 714	1 962 330	1 941 441	1 394 715	1 357 662
Infrastructure transfers	656 524	877 969	644 629	677 194	652 475	643 319	686 542	709 404	740 864
Infrastructure transfers: Current	3 300	2 450	1 700	2 000	2 000	2 000	1 700	-	-
Infrastructure transfers: Capital	653 224	875 519	642 929	675 194	650 475	641 319	684 842	709 404	740 864
Infrastructure: Payments for financial assets	-	-	-	-	-	-	-	-	-
Infrastructure: Leases	95 684	108 096	204 303	163 462	177 887	184 096	176 654	181 662	184 870
Non infrastructure	1 054 686	1 133 140	1 242 197	806 535	931 098	901 771	1 586 343	1 817 127	1 847 273
Total	11 764 175	12 173 943	12 099 267	12 039 671	12 412 374	12 411 909	12 440 139	12 598 068	13 195 787

Note: HSDG is excluded

1.3.1 Existing Infrastructure Assets

As it has been mentioned above, a substantial amount of infrastructure funding is reflected against Existing infrastructure assets, through Maintenance and repair: Current, Upgrades and additions: Capital and Refurbishment and rehabilitation: Capital. This indicates a provincial direction in focusing on maintaining and improving the existing assets base before deterioration which may require more costly intervention than construction of new infrastructure.

Maintenance and repair: Current caters for routine, preventative, mechanical servicing and other maintenance. There is a fluctuating trend between 2014/15 and 2016/17 as projects may have started as current and were found to be capital in nature during the investigation or construction stage. A significant positive growth of maintenance and repair in 2017/18 is caused by a shift in focus from building new infrastructure to the maintenance of existing asset base. A decrease in 2018/19 MTEF is as a result of fiscal consolidation.

Upgrades and additions: Capital - An increasing growth trend between 2014/15 to 2016/17 was mainly due to changes that happened during investigation which may change the classification as indicated above. The decrease from 2017/18 to 2018/19 due to an increase in current maintenance which is commendable as it will minimise costly upgrade. However there is an increase again in the two outer years of the MTEF.

Refurbishment and rehabilitation: Capital – This category has a positive growth rate which shows a focus on the existing assets since 2014/15. The decrease in allocation over the 2018/19 MTEF is due to fiscal consolidation.

1.3.2 Infrastructure Transfers

The Infrastructure transfers category refers to the funding that is transferred to the municipalities and public entities for the infrastructure projects which can be capital or current in nature. The high growth in 2016/17 is ascribed to the Human Settlement's Capital transfer for Community Residential Unit (CRU) Programme, Operational Costs for Accredited Municipalities and once-off additional funding allocated to RBIDZ. The decreasing trend from 2017/18 financial including the 2018/19 MTEF is largely due to the anticipated winding up of the CRU programme in the eThekweni Metro. The Department of Arts and Culture, Department of Human Settlement, and Department of Sports and recreation also transfer funds to municipalities. In 2015/16 the bulk of these transfers are from Department of Economic Development, Tourism and Environmental Affairs (DEDTEA) for economic infrastructure. The DEDTEA transfers relate to the capital development projects of the Dube Trade Port Cooperation (DTPC) and Richards Bay Industrial Development Zone (RBIDZ) in line with their Master Plans.

The Department of Arts and Culture transfers reflects Capital transfers to municipalities for the building of libraries and museums. Mainly this is attributed to continued transfers to eThekweni Metro in respect of the mega-library in each year of the MTEF and a contribution to uMngeni Municipality for the construction of the Royal Tembe Museum in 2017/18.

The Department of Sport and Recreation spending against Infrastructure transfers: Current relates to the funding for maintenance that is paid to municipalities for the maintenance of sport facilities constructed by the department. Infrastructure transfers: Capital relates to capital projects undertaken by the municipalities. This is decreasing in the outer years due to the department's decision to minimise the use of municipalities as implementing agents for the construction of sport facilities.

1.3.3 Infrastructure Leases and Non-infrastructure

The category on leases caters for both finance leases and operating leases and its expenditure in a period of seven year remain between 1 and 2 percent.

The non-infrastructure is for spending not directly for the construction or procurement of infrastructure assets but payments relating to stand-alone purchases of goods and services, as well as purchases related to maintenance and repair of non-infrastructure.

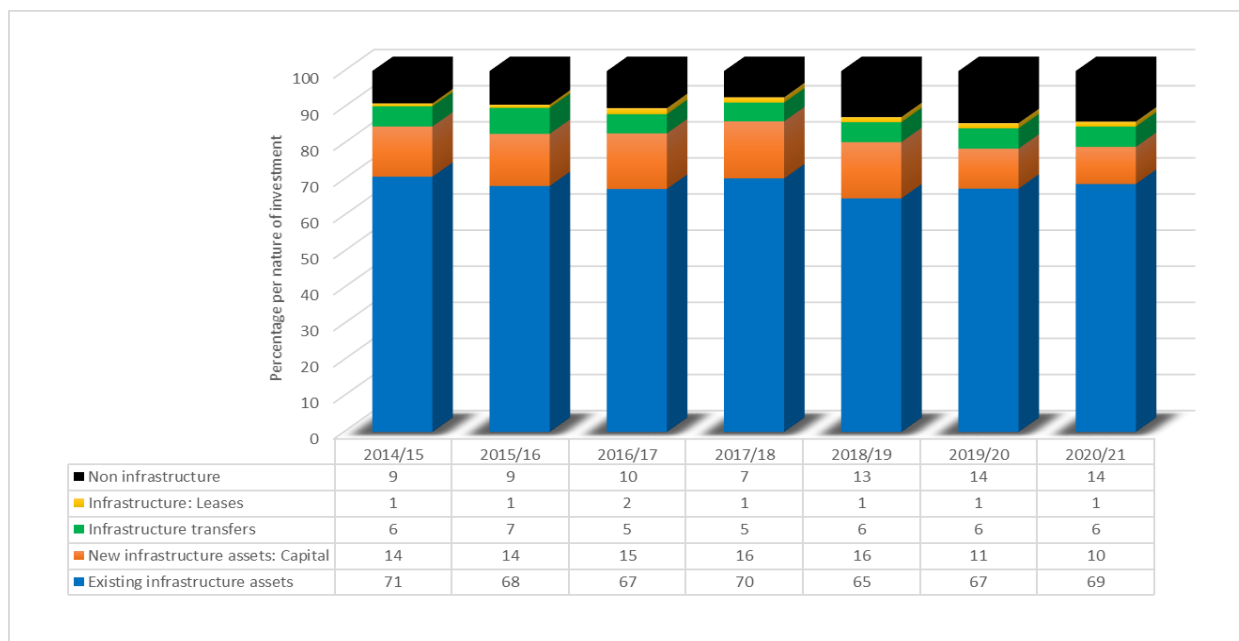

Figure 3: The split of payments and estimates per nature of investment

1.4 Infrastructure Sources of Funding

The province receives the infrastructure budget from conditional grants and Equitable Share. The Table 1.4 shows the conditional grants payment and estimates for the provincial departments. The conditional grants have special conditions according to the Division of revenue Act (DoRA). These conditions are mainly to encourage effective and efficient management of the Grants. To this effect National Treasury introduced the performance-based system for Health and Education in the 2012 Medium Term Budget Policy Statement (MTBPS). The approach is aimed at reducing inefficiencies in the infrastructure delivery chain, by promoting sound planning in order to achieve better value for money.

The departments of Education and Health can access additional financial incentives to the provincial baselines by submitting planning documents and performance reports that meet the minimum requirements as outlined in the guidelines for the performance-based system. The financial incentives are ring-fenced within the baselines of the Education Infrastructure Grant (EIG) and Health Facility Revitalization Grant (HFRG). The financial incentive must be committed in the financial year allocated and is most suitable to plan towards maintenance of existing infrastructure assets or towards planning stages of new projects to be constructed in the following financial year. In order to qualify for the incentive allocation, the provincial department must attain an overall minimum score of 60%. Both the departments of Education and Health have received the incentives since it started in 2015/16. The Table 4 below shows the Infrastructure Conditional Grants Payments and Estimates per Department.

Table 4 Infrastructure Conditional Grant Payments and Estimates

R thousand	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-term Estimates			
	2014/15	2015/16	2016/17				2017/18	2018/19	2019/20	2020/21
	Equitable share	7 122 481	7 075 605	6 877 704	6 935 294	7 307 997	7 307 532	7 412 961	7 752 379	7 979 064
Department	Conditional Grant	4 641 694	5 098 338	5 221 563	5 104 377	5 104 377	5 104 377	5 027 178	4 845 689	5 216 723
Agriculture and Rural Development	CASP & Ilima/Letsema Project grant	59 907	71 237	72 812	50 017	50 017	50 017	63 824	48 204	55 892
Education	Education Infrastructure grant	1 385 781	1 976 683	2 045 211	1 993 146	1 993 146	1 993 146	1 866 435	1 794 644	1 991 333
Health	Health Facility Revitalisation grant	1 362 469	1 229 775	1 114 693	1 149 355	1 149 355	1 149 355	1 202 480	1 153 049	1 216 467
Transport	Provincial Road Maintenance grant	1 788 158	1 779 255	1 925 378	1 828 970	1 828 970	1 828 970	1 826 745	1 772 792	1 870 031
Arts and culture	Community Library Services grant	45 379	39 388	63 469	82 889	82 889	82 889	67 694	77 000	83 000
Total Infrastructure receipts		11 764 175	12 173 943	12 099 267	12 039 671	12 412 374	12 411 909	12 440 139	12 598 068	13 195 787
	Human Settlements Development grant	3 509 045	3 543 852	3 124 702	3 477 567	3 677 567	3 677 567	3 52 757	3 275 125	3 508 205

The Conditional Grants for Agriculture comprised of Comprehensive Agricultural Support Programme (CASP) and Ilima/Letsema Project grant. CASP and Ilima/Letsema Project Grant contributes a portion for buildings and other fixed structure. The amount indicated in Table 4 is only payments and estimates for building and other fixed structure. Both funds show an increasing trend from 2014/15 to 2016/17 and decrease in 2017/18. The decrease from 2017/18 is mainly due to change in funding mechanism. In the 2018/19 MTEF the Department shows a fluctuating trend due to budget cuts that will be implemented during the 2019/20 and 2020/21 financial years.

The Education Infrastructure Grant (EIG) is the funding made available to supplement the Department of Education to fund provincial education infrastructure for construction, maintenance, upgrading and rehabilitation of existing Education infrastructure in order to meet the required minimum norms and standards. The funding is also utilised to address damages to infrastructure caused by natural disasters as well as to enhance capacity to deliver infrastructure. The Department of Education shows a positive growth between 2014/15 and 2016/17, while a negative growth is realised from 2017/18, 2018/19 and 2019/20 MTEF. A slight budget increase is only realised in the last year of the 2018/19 MTEF. For the 2018/19 financial year the Department of Education received an amount of R133.6 million from the National Treasury's performance-based incentives grant.

The Health Facilities Revitalisation Grant (HFRG) is mainly used to fund the construction of new, maintenance, upgrading and rehabilitation of existing infrastructure in health, including health technology and to enhance capacity to deliver health infrastructure. The Department of Health has a slight negative growth that commenced in 2014/15 up to 2016/17 due to the National fiscal consolidation. There is a positive growth in the financial 2017/18 and throughout the 2018/19 METF. The 2018/19 HFRG includes the R95million incentives that was awarded to the Department of Health from National Treasury's the performance-based incentives grant. Major projects being funded over the 2018/19 MTEF include the Ngwelezane Hospital surgical wards and security upgrade, the new Town Hill Office Park and the King Edward VIII Hospital upgrade of the nursery and repair of the storm water sewer and parking facility. The allocation over the MTEF relates mainly to Dr Pixley ka Seme Hospital project, which is expected to be complete in 2019/20.

The PRMG supplements provincial investments for routine, periodic and special maintenance of road infrastructure in the province. Department of Transport shows a fluctuating trend between 2014/15 and 2016/17. Again, the grant has been substantially reduced over the 2017/18 MTEF. This is as a result of the change in the formula used to allocate this grant to provinces. There are apparent further cuts shown in 2018/19 MTEF due to fiscal consolidation.

The Community Library Service Grant (CLSG) is to transform urban and rural community library infrastructure, facilities and services (primarily targeting previously disadvantaged communities) through a recapitalised programme at provincial level in support of local government and national initiatives. This grant is utilised for both Infrastructure and non-infrastructure activities such as library material and capacity building programmes for community library. The amount indicated in Table 4 are only payments and estimates for building and other fixed structures procured by the Department. The Community Library Service grant fluctuates from 2014/15 up to 2016/17 due to R20.093 million under-spending in 2014/15, mainly as a result of challenges with the construction and upgrade of various libraries such as Ingwavuma,

Bruntville, Bilanyoni and Manyiseni. The department received a roll-over of R19.856 million in 2015/16 for the refurbishment of library depots, e.g. Pinetown and Dundee library depots. The Community Library Services grant was further reduced in 2018/19 and 2019/20 due to fiscal consolidation.

1.5 Infrastructure Budget Allocations per Municipal District

Table 5 indicates the infrastructure budget per district municipality including the eThekweni Metro. The eThekweni Metro has the highest number of 695 with 14% of the infrastructure budget in the 2018/19 and the budget decrease to 12% and 10% in the outer years of the MTEF. It is followed by King Cetshwayo District which has a total number of 580 projects with a budget share of 10% in 2018/19 which increase to 12% in 2019/20 and decrease to 9% in 2020/21 financial year. Amajuba District has the lowest budget at 4% in 2018/19 and 2019/20, this increase to 5% in the last year of the MTEF. Ugu District has the lowest number of project but the second lowest budget allocation. This is important to note as the number of projects does not determine the value of budget to be allocated but magnitude of work to be done in terms of cost of each project. The budget share per District Municipality ranges from 4 to 14%. The Province wide projects are packaged projects that cut across various municipalities. These are general maintenance projects including roads. There are 105 that cut across various municipalities with 10% of infrastructure budget in 2018/19 and 9% in the two outer years of the 2018/19 MTEF.

Table 5 Infrastructure Budget allocations per Municipal District

Project Status (R Thousand)	Number of Projects	2018/19 Budget	2019/20 Budget	2020/21 Budget	2018/19 Budget	2019/20 Budget	2020/21 Budget

Zululand	789	1 013 575	949 226	1 095 695	8%	7%	10%
Province Wide	105	1 490 800	1 404 787	1 708 295	10%	9%	9%
Total	5 302	12 440 139	12 598 068	13 195 787			

1.6 State of Readiness to Implement Projects

The Table 6 indicates the state of readiness across the province. The province has a total number of 5302 infrastructure project in the 2018/19 MTEF which is comprised of projects from different provincial Departments. There are 1133 projects on tender stage and 42 projects have been handed over to contractors to start with construction. This indicates the project in the pipeline which may be ready for the implementation in 2018/19 MTEF. A number of 824 projects on construction have projected to spend R3.995 billion in the 2018/19 financial year, the expenditure will decrease to R2.224 billion in 2019/20 and 1.733 billion in 2020/21 financial year. The packaged projects are mainly maintenance projects which are

the biggest spenders as the province is focusing on the existing asset base. It is important to note that Health and Education use a portion of their Infrastructure conditional grant for the compensation of employees as indicated on Table 6.

Table 6 State of Readiness to Implement Projects

Project Status (R Thousand)	Number of Projects	2018/19	2019/20	2020/21
Project Initiation	928	231 793	262 723	381 360

1.7 Conclusion

The services such as health care, education, road network and other social services are critical to provide for the socio-economic needs of the citizens. It is therefore, important for the Province to invest in the construction and maintenance of the infrastructure that makes it possible to deliver those services. To this end, the KZN province is committed to investing a substantial amount of funds to the infrastructure development. This is evident as the infrastructure budget indicated a highest percentage of Equitable Share invested in Infrastructure as oppose to Infrastructure conditional grants. The province again shows a commitment in maintaining the existing Infrastructure Assets compared to the construction of new infrastructure. This indicates a cost effective budget split that focusses on what the province owns in order to minimise costly capital works due to dilapidated infrastructure.

The outlook per vote below describes each Department's Infrastructure programme strategic overview as well as the priorities in the 2018/19 MTEF. The Source of funding, payment and estimate per nature of investment, the outlook for the 2018/19 MTEF period and state of readiness are also deliberated. The annexures below show the projects per department which are anticipated to be implemented in the 2017/18 MTEF. The 2017/18 Estimates of Capital Expenditure (ECE) is the first publication of Infrastructure project lists by the KwaZulu-Natal Province. It is important to note that the list is only infrastructure projects planned by each department. The project list indicates the name of each project and gives a brief detail e.g. the location, the estimated start and finish date and financial information of each project. It must be noted that some maintenance projects are clustered together into packages based on their nature and location but all capital projects are indicated as individual projects.

2. OUTLOOK PER DEPARTMENT/ VOTE

Vote 1

Office of the Premier

1. Strategic Overview of Infrastructure Programme

The Office of the Premier's infrastructure budget is mainly spent on the construction, refurbishment and rehabilitation of administrative buildings, the premier's Parkside residence and the Royal palaces. The department's infrastructure priorities include in the 2018/19 MTEF include the Royal Palaces and Administrative buildings.

2. Funding of Infrastructure

The Table 1.1 indicates the source of funding allocated for infrastructure. The Department only receive the infrastructure budget from the Equitable Share. The budget funds the administration buildings as well as the Royal palaces. The trend from the 2014/15 financial year fluctuates. The significant increase in 2016/17 was attributed to the roll-over of R8 million towards the renovations of the Royal Palaces.

Table 1.1 : Vote 1 - Revenue source for infrastructure

Funding Source (R Thousand)	Audited Outcome			Main Appropriation	Adjusted Appropriation 2017/18	Revised Estimate	Medium-Term Estimates		
	2014/15	2015/16	2016/17				2018/19	2019/20	2020/2021
1. Equitable Share	10 049	2 271	18 189	5 034	11 147	11 147	20 502	20 115	20 564
2. Infrastructure Conditional Grant	-	-	-	-	-	-	-	-	-
Total	10 049	2 271	18 189	5 034	11 147	11 147	20 502	20 115	20 564

The Table 1.2 details a summary of provincial estimates by nature of investment. The existing infrastructure asset budget fluctuate over a period seven years. The reduction in 2015/16 was primarily attributed to the suspension of the construction of the Training Academy. The significant increase in 2016/17 was attributed to the roll-over of R8 million towards the renovations of the Royal palaces. The increase in the 2017/18 Adjusted Appropriation relates to a further roll-over of the above-mentioned funding for the Royal palaces, the construction of six rondavels at the eNyokeni Palace, rehabilitation at the Premier's Parkside residence in respect of cracks in the swimming pool and general repairs to the pool surrounds, as well as electrical rewiring at the Premier's Parkside residence.

Table 1.2: Vote 1 - Summary of provincial estimates by nature of investment

R thousand	Outcome			Main appropriation	Adjusted appropriation 2017/18	Revised estimate	Medium-term estimates

3. Outlook for the 2018/19 MTEF Period

The department will continue with the Royal Palaces projects and other administration buildings. The largest portion of the budget in the 2018/19 financial year is allocated to the renovations and refurbishments required at the Royal Palaces. The allocation of maintenance and repairs is provided under a packaged programme to provide for preventative and corrective maintenance. The table 1.3 indicates the number of projects per District Municipality. The Projects in uMgungundlovu Municipality are project in the Premier's Parkside residence and the Terry Street parking facility that is being developed alongside the Moses Mabhida head office building.

4. State of Readiness

Table 1.4 shows the state of readiness of the department to implement projects in the 2018/19 MTEF period. The department has a total of 8 projects at various stages of the project cycle including the packaged projects. The 2 projects on construction relate to renovations of the leaking roof a Moses Mabhida Building and the renovations at Parkside residence. The 5 packaged projects mainly comprised of maintenance and repairs to the administrative buildings.

Table 1.4: Vote 1 - Shows the State of Readiness to Implement Project

The Table 1.4 indicates the allocation per district municipality. The Department is spending mainly in uMgungundlovu and Zululand District Municipalities.

Vote 2

Provincial Legislature

The Provincial Legislature will spend their infrastructure budget mainly on day-to-day maintenance, hence the list of projects is not included. It must be noted that the repairs to the Law Society Building will form part of the maintenance programme.

Vote 3

Agriculture and Rural Development

1. Strategic Overview of Infrastructure Programme

The Department of Agriculture and Rural Development's infrastructure budget is mainly spent on the construction, refurbishment and rehabilitation of agricultural infrastructure. These include irrigation schemes, dam scooping, broiler houses, store houses, boreholes, piggery and a few major facilities such as the abattoir and the food processing plant in uMkhanyakude District Municipality. The funds are also used for the construction or renovations of office accommodation and the upgrades to the two provincial agricultural colleges (Cedara and Owen Sithole). Most of the infrastructure funded does not belong to the department but is handed over to the beneficiaries upon completion.

In order to improve access to services rendered, over the last few financial years the department has been actively acquiring land for the construction of district and local offices where there are current leases in place. The site acquisition programme has resulted in four sites being identified and these are in the process of being acquired. These are located in Dannhauser, Utrecht, Edumbe and Mtubatuba. It is envisaged that as the acquisition of each site is finalised, the department will engage in an infrastructure project to construct a state owned facility.

2. Funding of Infrastructure

The Department of Agriculture and Rural Development's infrastructure budget is mainly utilised for the construction, refurbishment and rehabilitation of agricultural infrastructure. These include amongst others, irrigation schemes, chicken broiler houses, store houses, boreholes etc. Table 3.1 shows the different funding sources. The Department receives the Comprehensive Agricultural Support Programme (CASP) Grant and Equitable Share. A portion of CASP funds the fixed and building structures but the bulk of infrastructure projects are funded from Equitable Share.

Table 3. 1: Vote 3 - Revenue source for Infrastructure

Funding Source (R Thousand)	Audited Outcome			Main Appropriatio	Adjusted Appropriatio	Revised Estimate	Medium-Term Estimates		
	2014/15	2015/16	2016/17	2017/18			2018/19	2019/20	2020/2021
1. Equitable Share	209 013	198 000	199 947	97 287	130 460	133 540	139 825	110 630	132 026

3. Outlook for the 2018/19 MTEF

Table 3.2 shows the number of projects in per nature of investment as well as the budget associated with it. In the 2017/18 financial year the department largely focused on refurbishment and rehabilitation of existing infrastructure and it shifts to the construction of new infrastructure assets in the 2018/19 financial year. The Department has a total number of seven projects in the 2017/18 and 2018/19 financial years of which two projects are for new assets, three for refurbishment and rehabilitation and one maintenance and repairs project. There is also an amount of R10.621 million infrastructure transfers (capital).

Table 3. 2: Vote 3 - Summary of provincial estimates by nature of investment

R thousand	Outcome			Main appropriation	Adjusted appropriation	Revised estimate	Medium-term estimates		
	2014/15	2015/16	2016/17				2017/18	2018/19	2019/20

Table 3.3 is the infrastructure estimates allocations based on the location of the projects. The department budget is planning on spending on projects that are located in different parts of the province (province wide), the range from stock handling facilities, animal housing facilities, broiler houses, aqua culture, boreholes, fencing, drainage canals, irrigation schemes, dipping facilities, dams, water canals, scooping of dams, the research farms and the two agricultural colleges which are part of the 20 projects. The uMkhanyakude District has three projects that in the financial year, which are the uMhlabuyalingana Abattoir, Jozini Processing Facility and the Makhathini Flat Irrigation Scheme.

Vote 4

Economic Development, Tourism and Environmental Affairs

1. Strategic Overview of Infrastructure Programme

The purpose of the infrastructure programme with the department is to manage and plan for co-ordinated developmental projects that are a provincial priority and a catalyst to unlocking economic growth and attracting investments. The department does not implement infrastructure directly but transfers funds to two provincial public entities that are responsible for developing infrastructure which will contribute to economic growth of the Province. The two provincial public entities are:

- Dube Trade Post Corporation (DTPC); and
- Richards Bay Industrial Development Zone (RBIDZ).

(a) Dube Trade Post Corporation (DTPC)

The DTPC's mandate is to facilitate economic growth in KZN through the development of the Dube Trade Port which has been designed as a Special Economic Zone (SEZ). The SEZ is a special purpose vehicle to attract domestic and foreign direct investment for the promotion of imports and exports. The DTPC is also responsible for creating an enabling environment that drives the development of air logistics business as well as creating a physical environment for the implementation of the government's industrialisation policy. The DTPC is a 2940 hectare development and is home to the King Shaka International Airport. The Dube Trade Port combines the international airport, dedicated cargo terminal, ware housing, offices, retail space and agriculture. It forms the heart of the Durban Aerotropolis.

The Trade Port is surrounded by the multiple zones namely;

- Dube Cargo Terminal;
- Dube Tradezone 1 and 2;
- Dube City;
- Dube Agrizone; and
- Dube I-Connect.

(b) Richards Bay Industrial Development Zone (RBIDZ).

The RBIDZ was established to develop an industrial estate in order to attract domestic and foreign investors mainly within the mineral wealth, deep-water port and marine oriented industries. The IDZ comprises of 240 hectares of land with a future potential to expand to 1000 hectares of land. The key focus sectors are metal beneficiation (Aluminium, Iron ore, Titanium, ICT Techno-Hubs and Innovation Hubs); Renewable Energy (Solar, Fuel Cells and Biomass); Agro-processing and lastly Marine Industry Development. The support is in the form of planning, monitoring and the actual transfer of funds to the entities.

The ongoing projects are the Dube Trade Port Corporation (DTPC) and the Richards Bay Industrial Bay Industrial Development Zone (RBIDZ). The focus of the DTPC over the 2018/19 MTEF includes the multi-storey parkade, the bulk earthworks at the TradeZone and the bulk infrastructure to fully service the sites for occupation by investors. This will result in a further 50 hectares of land being made available for private sector development. There is also the construction of the mini-factories at TradeZone 1 which will continue.

The Richards Bay Industrial Development Zone (RBIDZ) will continue with the acquisition of land is a significant challenge with the protracted and often misaligned approval processes for Environmental Impact Assessments (EIAs), Water Use Licence Applications (WULA), the requirements of the Spatial Planning and Land Use Management Act (SPLUMA). As a result the priority is to resolve these issues in order to fully implement the project and realise the planned spin-off. During 2018/19 the RBIDZ will continue with the acquisition of the Bayside site as well as the land in Phase 2A. The construction of the internal civil and electrical engineering works will continue in Phase 1F.

2. Funding of Infrastructure

The department has two (2) major projects which are funded by Infrastructure Transfer - Capital. These transfers relate to the capital development projects for the Richards Bay Industrial Development Zone (RBIDZ) and the Dube Trade Port Corporation (DTPC). The allocated budget is R530.513 million for 2018/19 financial year and an estimated R1.681 billion for the MTEF period; both funded fully by the Equitable Share.

Table 4. 1: Vote 4 - Revenue source for Infrastructure

Funding Source (Thousand)	(R)	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-Term Estimates		
		2014/15	2015/16	2016/17				2017/18	2018/19	2019/20
1. Equitable Share - Dube Trade Port Corporation	472 577	433 239	337 321	365 919	341 959	341 959	400 983	423 438	446 727	
2. Equitable Share - New infrastructure assets	28	17	-	-	-	-	-	-	-	
3. Equitable Share - Richards Bay Industrial Development Zone	68 170	198 947	126 370	127 605	127 605	127 605	129 530	136 784	144 307	
Total	540 775	632 203	463 691	493 524	469 564	469 564	530 513	560 222	591 034	

3. Outlook for the 2018/19 MTEF Period

The department's ongoing priorities are the Dube Trade Port acquisition of Bayside to RBIDZ ownership is still in process, looking at finalising sale in 2018/19 financial year. The efforts to acquire the Phase 2A and the negotiations between the RBIDZ and the landowner are also still underway. Phase 1F which is the construction of internal civil, electrical engineering services is in progress and expected to be complete within 2018/19. There is a challenge in the supply of bulk industrial water and sea outfall effluent infrastructure to Phase 1F, but mitigating interventions are explored and are ongoing. The focus has shifted to revenue generating by means of attracting tenants and investors. It must be noted that the project is a long term project which is in line with the 50 year master plan.

The Dube Trade Port Corporation's (DTPC) main objective is to facilitate economic growth by developing the Dube Trade Port and attracting long term investment in KZN. This will include Major construction projects planned for 2018/19 include the multi-storey parkade on Blocks A and B at Dube City and the bulk earthworks at TradeZone 2. At Dube City, the parkade will consist of an initial five storeys to provide for the additional parking requirements. At TradeZone 2 bulk infrastructure will need to be undertaken to fully service the sites for occupation by investors. This will result in a further 50 hectares of land being made available for private sector development within the DTP SEZ. The department has allocated R530.153 million, R560.222 million, R591.034 million respectively for the two projects.

The two project are located in the iLembe and King Cetshwayo Districts, the larger part of the budget is for the Dube Trade Port with an allocation of R400.983 million for 2018/19 and this figure continues to rise within the MTEF. The RIDZ located in King Cetshwayo District has been allocated R129.530 million, which also increases over the METF to R144 727 million.

Vote 5

Education

1. Strategic Overview of Infrastructure Programme

Purpose of the infrastructure programme within the department is to maintain and upgrade existing schools and provide new schools as and when required. The programme also aims to provide other school facilities including sports fields, specialists' rooms and infrastructure for sanitary requirements for all schools in line with the approved Minimum Uniform Norms and Standards for Public School Infrastructure. The department's priorities comprise the provision of libraries, laboratories, multipurpose classrooms and computer rooms at secondary schools through a dedicated programme (Curriculum Redress) whilst at the same time providing these facilities at all schools in line with either the new school or upgrades and additions programme.

In 2007, the Department commissioned a study which was conducted by the University of KwaZulu Natal. The study identified areas of greatest need in the province and highlighted the distinguishing characteristic of KwaZulu-Natal Department of Education, when compared with other provinces. Basic infrastructure, textbooks, stationery, equipment and human resources required to service the province, as well as the limited budget available for this purpose was identified as having a profound impact on the nature and quality of the curriculum that can be delivered. The study further found that an estimated a sum of approximately R59 billion is needed to eliminate the infrastructure backlog by 2030. Despite the challenges the Department has ensured that it provides quality education for all its learners.

2. Funding of Infrastructure

The source of funding for infrastructure projects for the department is Equitable Share as well as the Education Infrastructure Grant (EIG). Table 5.1 depicts the Equitable Share and the education infrastructure grant for seven years. The Equitable Share decreased in 2015/2016. There was a further decrease in 2016/2017 with further cuts in the outer years of the MTEF. The decrease in the Equitable Share was due to the department moving funds from infrastructure to address other pressures within the department. The conditional grant decreased from the 2016/2017 financial year to the 2018/2019 financial year due to fiscal consolidation, however it is projected to increase in the 2019/2020 financial year.

The EIG aims to help accelerate construction, maintenance, upgrading and rehabilitation of new and existing infrastructure in education including district and circuit accommodation. It also aims to enhance capacity to deliver infrastructure in education and to address damage to infrastructure caused by natural disasters. This grant uses a User-Asset Management Plan (U-AMP) as the business plan, which contains the following:

- demand and need determination
- education infrastructure improvement priorities and targets
- current performance of education infrastructure
- project portfolio
- U-AMP improvement plan
- project lists for a period of at least 10 years
- maintenance plan
- financial summary

Vote 5: Education

- organisational and support plan

The KwaZulu-Natal Department of Education must submit a signed off monthly provincial infrastructure report on infrastructure programmes within 15 days after the end of each month to the relevant provincial treasury and DBE and submit quarterly performance reports on disaster allocations, to the PDMC and DBE. The Department must comply with the conditions of the grant framework and the relevant clauses within the stipulated timeframes in DoRA in order to qualify for the grant.

The EIG has an incentive component that provincial Department of Education access based on accurate planning documents and performance reports that meet the minimum requirements as outlined in the guidelines for the performance-based grant system. The financial incentives are ring-fenced within the baselines of the Education Infrastructure Grant (EIG). The financial incentive must be committed in the financial year allocated and is most suitable to plan towards maintenance of existing infrastructure assets or towards planning stages of new projects to be constructed in the following financial year. In order to qualify for the incentive allocation, the provincial department must attain an overall score of 60%. For the 2018/19 financial Year the Department of Education received an amount of R133.6 million from the EIG performance incentive.

Table 5. 1: Vote 5 - Revenue source for Infrastructure

Funding Source (R Thousand)	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-Term Estimates		
	2014/15	2015/16	2016/17				2017/18	2018/19	2019/20

Table 5.2 details a summary of provincial estimates by nature of investment consisting of Existing infrastructure assets, Maintenance and repair, Upgrades and additions, Refurbishment and rehabilitation, and new infrastructure assets. The figures fluctuate over the seven year period due to various factors including fiscal consolidation and budget cuts. The non-infrastructure portion of the budget is related to compensation of employees for DORA funded posts, which aims to capacitate the infrastructure unit within the department with technical skills. The other portion of the non-infrastructure budget caters for leasing of office buildings in various district offices for the department to fulfil its mandate at district level. The department will continue in the 2018/2019 MTEF, to prioritise the water and sanitation projects in schools in order to respond to the Minimum Uniform Norms and Standards for Public School Infrastructure. The department will also continue with the large scale rehabilitation programme of all pit latrine toilets and septic tanks for various districts in the province.

In order to address deteriorating school infrastructure major renovations projects were undertaken at La Mercy Maths and Science Academy and James Nxumalo Agricultural High School which include the upgrading of classrooms, hostels and equipment.

3. Outlook for the 2018/19 MTEF Period

The Department will continue with maintaining, renovating and building new schools in 2018/19. New schools to be completed in 2018/19 include Goodhome secondary school in uThukela district, Mbongeleni primary school in uMzinyathi district, Mahlabeni primary school in uMkhanyakude, Cosmo primary school in uMgungundlovu, Siphumelele secondary school in King Cetshwayo district. Projects relating to new schools, curriculum support classrooms, laboratories, multi-purpose classrooms, as well as electrification, sanitation and water will continue so that basic functionality can be achieved in all 5 957 schools in KZN. The allocation towards existing infrastructure assets supports this commitment. In addition, all new schools will adhere to the basic norms in order to limit the backlogs and advance equality among all schools. The roll-out of water and sanitation, repairs to storm damaged schools and upgrades and additions will continue to receive emphasis. The construction of 34 new schools which started in previous MTEFs will be completed over the 2018/19 MTEF.

Table 5.3 provides a geographic spread of the projects according to municipal districts. The Zululand district has the highest number of projects with a total of 584 projects and R 267 million in the 2018/19 financial year and R199 million in 2019/20 and R247 million in 2020/21 financial year. This is followed by eThekweni Metro in terms of number of project, which has been split into two education districts namely Pinetown with 222 projects and Umlazi with 252 projects, totalling to 474 projects. The total estimated budget for the eThekweni Metro for 2018/2019 is R 348 million, R434 million and R 527 million for the outer years of the MTEF. King Cetshwayo district has 439 projects and an estimated budget of R 171 million in the 2018/ 19 financial year, R214 million and R 161 million in the outer year of the MTEF. The other districts are also indicated in the table 5.3 below. There are 7 maintenance packages that will be implemented in the districts throughout the province.

Table 5. 3: Vote 5 - Infrastructure estimates allocations per Municipal District

4. State of Readiness

Table 5.4 shows the state of readiness of the department to implement projects in the 2018/19 MTEF period. The department has a total of 3707 projects at various stages of the project cycle. The programme comprised 789 projects at initiation, 13 in pre-feasibility, 226 in the feasibility, 746 projects in the design, and 865 projects at tender stage. The department recorded 389 projects in construction stage and 448 project in practical completion stage. There are also 65 projects on hold due to the process of reprioritisation the department had undertaken after the infrastructure budget cuts started in the 2014/15 financial year. The largest portion of the budget over the MTEF is allocated to projects at construction stage. The bulk of the department's projects are at tender stage, project initiation and design stage. This is due to projects waiting for those on the construction stage to exit the pipeline before they can move to the next stage including construction due to financial constraints. The department also has a total of 109 packaged projects which include current maintenance, water, sanitation and fencing projects.

Table 5. 4: Vote 5 - State of Readiness to Implement Projects

Vote 6

Provincial Treasury

The Provincial Treasury has no allocated infrastructure budget.

Vote 7

Health

1. Strategic Overview of Infrastructure Programme

The Infrastructure programme ensures that the population, departmental staff and other external entities have safe, accessible and suitable spaces, structures and environments to render and receive services, conduct business and training, to plan and research, and learn. The provision of infrastructure enables the department to provide an environment in which services can be rendered in line with the strategic direction of the department with emphasis on maintenance and rehabilitation or renovation of existing facilities. The infrastructure budget is used to fund construction, upgrading and maintenance of health facilities such as clinics, community health centres and hospitals.

The Infrastructure Delivery Programme comprises of the following six sub-programmes in line with the Strategic Plan:

- Community Health Facilities;
- Emergency Medical Services;
- District Hospitals;
- Provincial (Regional) Hospital Services;
- Central Hospital Services; and
- Other Facilities.

The department has identified four main issues that are on its priority list(s) which are linked to governance and strategic direction:

- Accountable, fair and transparent management of immovable assets;
- Effective, efficient and economic use of immovable assets;
- Reduced overall cost of service delivery; and
- Reduced demand for new and leased immovable assets.

Over the MTEF the department is prioritising maintenance and rehabilitation of existing facilities. In this regards 48% is allocated to existing assets. Due to financial pressures within the sector the national Minister of Health directed that the province focuses on existing infrastructure as opposed to the construction of new infrastructure.

2. Funding of Infrastructure

The Department of Health utilises the infrastructure budget to fund construction, upgrading and maintenance of health facilities such as clinics, community health centres and hospitals. Table 7.1 indicates the revenue sources for the infrastructure budget which is a sum of Equitable Share and the Health Facility Revitalisation Grant (HFRG). The Equitable Share has shown a decreasing trend from 2014/15 up to 2018/19. This is due to the other pressures in the Department. The cash-blocking also had an effect in 2016/17. In the 2018/19 MTEF the Equitable Share indicates a positive growth.

The bulk of infrastructure budget comes from the HFRG which has shown a decreasing trend between 2014/15 up to the 2016/17 financial year. The decrease in 2015/16 follows once-off funding of R200 million allocated in 2014/15 for infrastructure pressures in the Health Facility Revitalisation grant. HFRG started to increase from the 2017/18 financial year and fluctuates in the 2018/19 MTEF. The HFRG will decrease in 2019/20 due the budget cut amounting to R38.137 million and an increase is expected in 2020/21 financial year.

The total allocations have been decreasing over the past years from 2014/15 to 2017/18 but in 2018/19 the estimates indicate an increase for the 2018/19 financial year. The HFRG has an incentive component based on the department submitting accurate planning document, accurate in year spending reports etc. For the 2018/19 financial year, the department scored 69% resulting in the incentive grant of R95.1 million allocated to the province.

Table 7. 1: Vote 7 - Revenue source for infrastructure

Funding Source (Thousand)	(R)	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-Term Estimates		
		2014/15	2015/16	2016/17				2017/18	2018/19	2019/20
1. Equitable Share		316 778	278 661	307 882	507 173	558 479	578 503	604 291	667 185	549 407
2. Health Facility Revitalisation Grant		1 362 469	1 229 775	1 114 693	1 149 355	1 149 355	1 149 355	1 202 480	1 153 049	1 216 467
Total		1 679 247	1 508 436	1 422 575	1 656 528	1 707 834	1 727 858	1 806 771	1 820 234	1 765 874

Table 7.2 shows the summary of provincial estimates which are divided into the nature of investment, the bulk of the budget is reserved for the maintenance, upgrades, additions and refurbishment of existing infrastructure. The second largest investment is the new infrastructure, the balance is shared between servicing leases and budgeting for non-infrastructure items such as resources deemed necessary to enable delivery of infrastructure programme.

Table 7. 2: Vote 7 - Summary of provincial estimates by nature of investment

3. Outlook for the 2018/19 MTEF Period

Implementation of the Dr. Pixley Ka Seme Hospital in preparation for commissioning of Phase 1 services in 2019/20, where applicable from Addington and Mahatma Gandhi Hospitals will continue. Smaller projects include the installation of 51 autoclaves across the province. The Department will continue addressing backlogs in fixed equipment maintenance namely lifts, air-conditioners, chillers, boilers, etc. The day-to-day maintenance at all facilities such as urgent unplanned reactive maintenance, as well as servicing of plant, equipment, air conditioning and lifts will be prioritised.

Table 7.3 shows the distribution of the projects and the allocations per district municipalities. On average, the eThekweni Metro has the highest concentration of projects and allocation of funds. The uMgungundlovu District has the second highest concentration of projects but with a reduced budget allocation if compared to eThekweni Metro. It must be noted that urban district municipalities with high population density have been allocated a larger portion of funding compared to the rural districts. The budget per district is determined by the magnitude of work to be done rather than the number of project for example King Cetshwayo has less number of project but high funding when compared to Ilembe district which has a large

number of project with less funding. This It must also be noted that the packaged projects have been allocated on average within the MTEF 31% of the budget which cut across various District Municipalities.

Table 7. 3: Vote 7 - Infrastructure estimates allocations per municipal district

4. State of Readiness

Table 7.3 shows the state of readiness including the budget allocations on each project status. In the 2018/19 MTEF the department has a total number of 321 projects with an estimated budget of R1.806 billion , R1.820 billion and R1,765 billion.. The projects statuses vary from initiation to final completion. It must be noted that some projects that are construction stage are already committed and contracted. To this effect 48% of budget comprises of projects which are in construction in the 2018/19 financial year are already committed. There are 31 projects in construction, 27 in practical completion and 20 in final completion. The 245 projects that are in the pre-construction stage have been allocated 25% of the budget and a further 25% is also reserved for 8 packaged projects which are implemented across the province at various delivery project statuses. Only 2% of the infrastructure allocation has been put aside for closing out and commissioning. A total number of 37 projects on practical and final completion will be closed out in the 2018/19 MTEF.

Human Settlements

1. Strategic Overview of Infrastructure Programme

The Department of Human Settlements infrastructure Equitable Share budget is utilised for social and economic amenities as well as human settlement development programmes which excludes the construction low income housing. The social and economic amenities include recreational parks, crèche, taxi ranks and community halls. These amenities are built and transferred to the municipalities for operating and also maintenance. The department does not directly implement the construction of housing projects and the construction of the Community Residential Units (CRU's), the funds are transferred to the municipalities for implementation of approved projects and programmes.

The department's main funding relates to the Human Settlement Development Grant (HSDG), which aims to promote the provision of low income housing using different programmes such as project linked subsidies, people's housing programmes, Integrated Residential Development Programme (IRDP), rural housing subsidies, Informal Settlements Upgrade (ISU) and social housing.

The main focus areas are as follows which are aligned to the strategy of the department is as follows:

- Eradication of slums;
- Strengthening governance and service delivery;
- Ensuring job creation through housing delivery;
- Restoring dignity to military veterans through decent housing;
- Accelerating the hostel redevelopment and upgrade programme;
- Creating rental / social housing opportunities;
- Building the capacity in social housing stakeholders (i.e. Municipalities);
- Promotion of homeownership;
- Provision of housing for vulnerable groups including those affected by HIV/AIDS;
- Ensuring the provision of incremental housing; and
- Implementation of financial service market programme.

2. Funding of Infrastructure

The Table 8.1a indicates the Human Settlements Development Grant (HSDG). HSDG excluded does not form part of other infrastructure grant since it is utilised for buildings that are not owned by government but get transferred to beneficiaries. The assets that get built by government are not owned by the state hence not regarded as government or provincial infrastructure. The province has a budget amounting to R3.152, R3.275 and R3.508 for the 2018/19 MTEF. All projects are listed in the approved business plan aligned with the integrated development plan (IDP) and the spatial development framework of municipalities as well as the built environment performance plan (BEPP) for metropolitan municipalities. Where municipalities have been accredited for the housing function, the provincial business plans will reflect relevant allocations, targets and outputs as agreed and approved with the respective municipalities.

Vote 8: Human Settlements

Provinces may utilise HSDG for the provision bulk infrastructure projects for basic services in non-metropolitan municipalities to unlock Human Settlement projects on condition that the funding is complementary with commitments by municipalities in the IDP and municipal budget for provision of such bulk and infrastructure with Municipal Infrastructure Grant funding.

Table 8. 1a: Vote 8 - Revenue source: Human Settlement Development Grant (HSDG)

R thousand	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-term Estimates		
	2014/15	2015/16	2016/17				2017/18	2018/19	2019/20
Human Settlements Development grant	3 509 045	3 543 852	3 124 702	3 477 567	3 677 567	3 677 567	3 152 757	3 275 125	3 508 205

Table 8.1b shows that the department’s infrastructure is funded by the provincial Equitable Share which relates to the Social and Economic Amenities programme such as Parks, crèche facilities , Taxi ranks, Community halls and the Community Residential Unit (CRU). The fluctuating trend from 2014/15 to 2016/17 relates to the operational costs for accredited municipalities, which are based on the actual performance by the municipality, as well as the transfer of R100 million to the eThekweni Metro in respect of the CRU programme in 2015/16.

Table 8. 1b: Vote 8 - Revenue source for Infrastructure

Funding Source (R Thousand)	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-Term Estimates		
	2014/15	2015/16	2016/17				2017/18	2018/19	2019/20
1. Equitable Share	144 915	190 062	153 728	167 698	168 939	162 953	128 706	131 629	140 971
Total	144 915	190 062	153 728	167 698	168 939	162 953	128 706	131 629	140 971

Table 8.2 shows payments and estimates per nature of investment. The infrastructure transfers are funds that are transferred to municipalities and entities for housing development. The Department will continue to transfer funds during the 2018/19 MTEF, The infrastructure transfers are R106 928 million which is 83% of the budget. The transfers are for funding the construction of social and economic amenities include recreational parks, crèche, taxi ranks and community halls. The balance of the budget, R21 777 million has been put aside for servicing leases.

Table 8. 2: Vote 8 - Summary of provincial estimates by nature of investment

3. Outlook for the 2018/19 MTEF Period

In the MTEF the department plans to continue with the provision of amenities, these are built as additional infrastructure to on previously completed projects due to the departmental shift, which was the provision of housing vs the development of a human settlement with all infrastructural requisites. The CRU programme under new infrastructure asset which are located in eThekweni Metro, replacing and upgrading the convectional hostels to Communal Residential Units, the outcome being provision of affordable rental accommodation and revenue generation for the Metro to assist with structural maintenance of the buildings. The bulk of the infrastructure budget is spent on these two programmes with the balance spent on servicing accommodation leases. The department plans to spend R128 708 million in 2018/19, R131 629 million in 2019/20 and R140 971 million over the MTEF funding these main programmes.

Table 8.3 shows the distribution of the projects and the allocations per district municipalities. The eThekweni Metro receives higher funding for the CRU programme and the other districts share the balance of R68 706 million of the total budget.

4. State of Readiness

The department transfers the funds accredited municipalities at the beginning of each financial year, the municipalities would then implement the programme. The accreditation assess the ability, capability and the state of readiness of the municipality prior to the transfer thus ensuring that the programme is delivered as the schedule, the memorandum of agreement with set targets. The department has 4 packaged ongoing projects which with an allocation of R128 706 million, R131 629 million and R140 971 million respectively.

Vote 9

Community Safety and Liaison

The Community Safety and Liaison Department has no allocated infrastructure budget.

Vote 10

Sports and Recreation

1. Strategic Overview of Infrastructure Programme

The purpose of the infrastructure programme in Sport and Recreation is to deliver sport and recreation facilities in communities and schools. The building of integrated sport facilities in communities and schools ensures the sharing of common spaces across race and class. The department not only builds new facilities which include sport fields, kick-about, futsal (action soccer) and combination sport courts, but also assists with the refurbishment of existing facilities and the supply of maintenance equipment for the up-keep of facilities. The Departmental priorities include reprioritisation of funds to Infrastructure transfers (capital), as a result of the department's decision to implement the construction of new sport facilities by municipalities as opposed to the department.

2. Funding of Infrastructure

The source of funding for all infrastructure projects for the department is Equitable Share. Table 10.1 reflects the revenue source for infrastructure. There was a decrease in the Equitable Share allocation in the 2015/2016 financial year which relates to was due to the completion of the Harry Gwala district office. The trend increased between 2016/17 and 2017/18 which was attributed by the construction of sport facilities by municipalities, such as uMzimkhulu, Newcastle and Mtubatuba sport fields. There is a decrease in the allocation expected in the 2018/2019 due to fiscal consolidation.

Table 10. 1: Vote 10 - Revenue source for infrastructure

Funding Source (R Thousand)	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-Term Estimates		
	2014/15	2015/16	2016/17	2017/18			2018/19	2019/20	2020/2021
1. Equitable Share	62 375	41 338	46 491	67 077	68 600	68 600	48 391	48 116	49 987
2. Infrastructure Conditional Grant	-	-	-	-	-	-	-	-	-
Total	62 375	41 338	46 491	67 077	68 600	68 600	48 391	48 116	49 987

Table 10.2 shows a summary of provincial estimates by nature of investment. The department's new infrastructure assets reflect a decreasing trend from R 40 million in 2014/15 to R15 million in each year of the 2018/19 MTEF due to the completion of the Harry Gwala district office in 2015/16 and the reprioritisation by the Department to transfer the construction of new sport facilities to municipalities. A decreasing trend in the 2018/19 MTEF period is due to the slow spending of the infrastructure programme and department moving funds to other programmes in order to ease spending pressures. Infrastructure transfers (current) to municipalities is also showing decreasing trend with a zero projections in the 2019/20 and 2020/21 financial years due to fiscal consolidation. It must be noted that transfers (current) is utilised to fund maintenance by municipalities, a decreasing trend to zero raises a concern that the department is not budgeting for the maintenance of existing infrastructure in the outer years. There is a risk that the existing infrastructure will be dilapidated and the cost of repairs will be high. Infrastructure transfers (Capital) shows a steady positive growth between 2014/15 up to 2016/17 and a higher increase in 2017/18 due to reprioritisation to transfer construction of new sport facilities to municipalities. A negative growth in the

2018/19 financial year is due to fiscal consolidation, but a positive growth is anticipated in the 2019/20 and 2020/21 financial year.

Table 10. 2: Vote 10 - Summary of provincial estimates by nature of investment

R thousand	Outcome			Main appropriation	Adjusted appropriation 2017/18	Revised estimate	Medium-term estimates

3. Outlook for the 2018/19 MTEF Period

Table 10.3 shows the infrastructure estimates per municipal district. There is a relatively equal distribution of projects per district municipality. There are three districts with 8 projects each namely, Amajuba, Ilembe and King Cetshwayo. There are three districts that have 7 projects each, namely Harry Gwala, Ugu and UMzinyathi. UMgungundlovu district has 5 projects and there are 4 projects in eThekweni. The department has allocated R 2 million from the EPWP grant as wages for maintenance staff at the sports facilities, however there are no projections for the outer years. The R9.4 million in Amajuba, Umzinyathi and Uthukela districts relates to the building of Fitness Centres estimated at R7.8 million each.

Table 10. 3: Vote 10 - Infrastructure Estimates per Municipal District

4. State of Readiness

Table 13.4 shows the state of readiness of the department to implement projects in the 2018/19 MTEF period. The department has a total of 72 projects at various stages. All 72 projects at planning stage since sports facilities are not usually multiyear projects therefore they are planned, implemented and completed within one financial year. The R 2 million referred to under non-infrastructure is EPWP grant funding.

Table 10. 4: Vote 10 - Shows the State of Readiness to Implement Projects

Vote 11

Cooperative Governance and Traditional Affairs

1. Strategic Overview of Infrastructure Programme

The Department's mandate range from co-ordination of organs of state to ensure maximum impact of cooperative governance. To achieve this mandate, a strategic direction which includes amongst others the creation of sustainable livelihood and rural development have been prioritised for improved decision making through citizen participation. The strategic overview of the infrastructure programme is to make sure that there is infrastructure to support the affective co-operative governance in all levels of government.

The Department will continue to support the Institution of Traditional Leadership with conducive infrastructure for Traditional Councils, OSS War Rooms and mobile government services. In addition, the Department supports municipalities with spatial alignment, funding and project management of new Community Service Centres to promote easy access to community services. This will be implemented either through the appointment of registered professional service providers and/or through a State Owned Entities.

2. Funding of Infrastructure

The Department receives infrastructure funding from Equitable Share. Table 11.1 as shown below depicts a positive growth between 2014/15 and 2016/17, followed by a steep decline only from 2016/17. This negative growth is primarily due to the introduction of the remuneration of Izinduna wherein the department had to reprioritise from within its baseline to effect the payments. The spike between 2015/16 and 2016/17 amounting to R110,922 million was an error from goods and services to buildings and fixed structures which was corrected in the audited numbers. The 2016/17 financial year also comprises funds for drought relief interventions undertaken by the Department through uMhlathuze Water Board as an implementing agent. The drought relief intervention included the provision of water tanks, drilling of boreholes etc. In the 2018/19 MTEF, the funding fluctuates due to budget consolidation. The Department does not receive conditional grants in respect of infrastructure delivery.

Table 11.1 below shows the funding trends per source of funding from financial year 2014/15 to 2020/21.

Table 11. 1: Vote 11 - Revenue source for Infrastructure

Funding Source (R Thousand)	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-Term Estimates		
	2014/15	2015/16	2016/17	2017/18			2018/19	2019/20	2020/2021
1. Equitable Share	41 689	43 086	110 922	20 674	42 144	42 144	43 054	31 672	38 794
Conditional Grant Funding	-	-	-	-	-	-	-	-	-
Total	41 689	43 086	110 922	20 674	42 144	42 144	43 054	31 672	38 794

Table 11.2 below categorises the infrastructure funding according the nature of investment from 2014/15 to 2020/21 financial years. Notably, there is an improvement in the Department's budget which is inclusive of an allocation for maintenance and repairs for the next MTEF period. There is a conspicuous decrease in the allocation for rehabilitation and refurbishment when compared to the period between 2015/16 to 2017/18. To this effects, in the 2018/19 MTEF the Department is planning to spend a substantial amount of its budget on both new and existing infrastructure.

Table 11. 2: Vote 11 - Summary of provincial estimates by nature of investment

R thousand	Outcome			Main appropriation	Adjusted appropriation 2017/18	Revised estimate	Medium-term estimates

3. Outlook for the 2018/19 MTEF Period

Provision of support to the Institutions of Traditional Leadership in the Construction, Rehabilitation and maintenance of Traditional Administrative Centres and Imizi Yezizwe infrastructure will continue during the 2018/19 MTEF. The Department will spend a substantial amount on the existing assets for maintenance and repairs as well as rehabilitation and refurbishment. The projects on existing infrastructure assets includes various traditional administrative centres such as in Molofe, Nxamalala, Cele and Maguzwana amongst others. The new infrastructure assets such as certain aspects of the Provincial Disaster management Centre and Matimatolo Community Service centre will continue in the 2018/19 MTEF.

The outlook for 2018/19 MTEF period will focus on the following:

- Creating job opportunities through the Community Service Centre (CSC) program;
- Continued support to Municipalities in the finalization of 4 previous financial year CSC construction projects such as Amahlubi CSC and the phased construction of 3 new CSC projects guided by budget resources;
- Provision of support to the Institution of Traditional Leadership in the Construction, Rehabilitation and maintenance of Traditional Administrative Centres and Imizi Yezizwe infrastructure; and
- Provincial Technical Assessment of Traditional Administrative Centres to ascertain building condition in terms of health and safety requirements and support rehabilitation prioritization.

Table 11.3 provides a geographic spread of the projects according to municipal districts. There are 6 packaged project throughout the province with an allocated budget of R7 million for 2018/19 and 2019/20 respectively, and R12.250 million for 2020/21. The Ilembe district has 3 projects budgeted at R15.350 million, UMgungundlovu has 5 projects budgeted at R14.866 million, Zululand district has 5 projects budgeted at R13.150 million and Umzinyathi district has 3 projects budgeted at R13 million over the MTEF period. These are the most funded districts over the MTEF period. The remaining districts have been each allocated a budget below R8 million over the MTEF. The eThekweni Metro with 2 projects and budget allocated at R1.2 million in financial year 2020/21.

Table 11. 3: Vote 11 - Infrastructure Estimates per Municipal District

District Municipality (R Thousand)	Number of Projects	2018/19	2019/20	2020/21

Total	45	43 054	31 672	38 794

4. State of Readiness

Table 11.3 depicts the state of readiness to implement projects. It indicates the number of projects on different project statuses as well as the projections from each status. There are 28 projects at initiation stage where project approvals are being developed. The Department has a total of 45 projects. These projects are primarily Traditional Administrative Centres and Community Service Centres.

The bulk of the budget over the 2018/19 MTEF is allocated in project initiation stage since these projects are still on initial stages and more funding will be required to be spent in the future. This is followed by the construction stage with a budget of R12 million in 2018/19. This decreases in 2019/20 and 2020/21 as some of the projects on construction are planned to be complete in 2018/19. The design stage has been allocated R10 million in 2018/19, R9 million and R11 million in the outer years of the MTEF.

Table 11. 4: Vote 11- State of Readiness to Implement Projects

Project Status (R Thousand)	Number of Projects	2018/19	2019/20	2020/21

Vote 12

Transport

1. Strategic Overview of Infrastructure Programme

The Department's strategic policy direction is to support socio-economic development through the provision of roads and bridges.

The department has set the following goals in order to achieve this:

- Provide mobility and accessibility within the province to achieve 32 890 kilometres of maintained road infrastructure by 2020;
- Promote and develop an integrated transportation system through developing three Integrated Public Transport Networks (IPTNs) operational plans; and
- Create and promote a safe road environment by decreasing road fatalities by 30 per cent (545/1 819) by 2020.

A total of 2 695 kilometres of existing gravel roads have been identified for upgrade to blacktop in order to support the economic development of the hinterland served by them as well as reducing the roads' accident risk (RAMP 2018/19:9). The split of the 2 695 kilometres is as follows:

- 1 110 kilometres identified due to them currently or potentially carrying in excess of 200 vehicles per day or 500 public transport passengers per day;
- 525 kilometres identified in order to open up areas with latent agricultural potential through reducing the transaction costs related to transport;
- 365 kilometres identified in order to improve access to areas with tourism potential in order to increase the number of tourists visiting the area and hence the economic opportunities for local communities; and
- 695 kilometres identified for social reasons in order to improve access to areas with high population numbers and/or high poverty levels.

A total of 267 kilometres of new links were identified to improve the transport linkages to historically disadvantaged communities which are necessary to ensure completeness and balance of the strategic road network (RAMP 2018/19:9). They therefore serve as a catalyst to release agricultural potential, economic development and social equity. It is proposed that this need should be addressed over 10 years.

The Department has a total road network of 31 715.37 kilometres of which 23 719.12 kilometres is unpaved, 7 986.44 kilometres is paved with various types of blacktop surfacing and 9.81 kilometres is paved with concrete (RAMP 2018/19:15). In relation to structures within the road network, the Department has 2 917 structures wherein 1 281 structures are bridges and 1 636 structures are major culverts (RAMP 2018/19:28).

The Road Asset Management Plan:

The infrastructure delivery programme of the Department is amongst other frameworks influenced by the Road Asset Management Plan (RAMP) which is a 10 year planning document (RAMP 2018/19:11). The strategic overview herein is based on the RAMP and the purpose is to:

- Improve the department's long-term strategic management of its road assets in order to find a mutually acceptable solution between the community's desired levels of service and the affordable delivery in the future;
- Assist by identifying standards, service levels and programmes by which the department will develop and deliver;
- Provide a background and current condition of road infrastructure in KZN;

Vote 12: Transport

- Emphasize road assets needs;
- Pursue measures that will ensure an acceptable level of service on the road network in the Province;
- Set out the responsibilities for the establishment and/or maintenance of the network; and
- Provide detail regarding financial implications.

The Department measures levels of service through mobility, accessibility, sustainability, road safety and user perception (RAMP 2018/19:18).

2. Funding of Infrastructure

The Department receives infrastructure funding from Equitable Share, Provincial Roads Maintenance Grant (PRMG) and Expanded Public Works Programme (EPWP) Grant. For 2018/19, the Equitable Share constitutes 79% of the budget. The Equitable Share trend depicts a continuous growth in the amount allocated i.e. from R4.658 billion in 2014/2015 to R5.851 billion in 2020/21. The PRMG on the other hand has had an upward and a downward movement; however, over the seven year period there is an increase from R1.788 billion in 2014/15 to R1.870 billion in 2020/21. The PRMG had its peak allocation in 2016/17 at R1.925 billion. Additional to the aforementioned, during 2017/18 the Department was allocated a supplementary budget to the value of R200 million for the storm damages resulting in a storm that had occurred on the 10th of October 2017.

Notably, the EPWP Grant consistently had funding from financial year 2014/15 to 2018/19. The two MTEF outer years have no indicative budgets allocated at this stage. The Department received the highest EPWP Grant allocation in 2018/19 when compared to the previous years, i.e. R76.562 million compared to R33.645 million in 2017/18 and an average of R57.033 million in prior years. EPWP is an incentive grant based on work opportunities created and adequately reported to the Department of Public Works. Therefore, the bump may be as a result of improved reporting by the Department which is commendable since it implies that the Department is creating work opportunities in communities where it operates.

There are grant conditions which stipulate what can be funded and what cannot be funded through the PRMG. The PRMG can be allocated to the following projects as identified and prioritised through the provincial Road Asset Management System (DORA 2016:170):

- Routine maintenance including day to day routine activities such as cleaning drains and culverts, vegetation control, line marking, guard rail repair, road sign repair, crack sealing, patching, edge repair, spot regravelling and blading;
- Periodic maintenance including periodically scheduled activities such as fog sprays/diluted, emulsions/rejuvenators, surface seals and functional asphalt overlays less than 50mm in thickness. For gravel roads it includes re-gravelling up to 100mm thick;
- Special maintenance including the repair of selected pavement areas up to maximum of 25 per cent of project length followed by application of surface seal or functional asphalt overlay less than 50mm. Also includes reinstatement of slope stability, repairs to existing structures and the repair of damaged caused by floods or accidents; and
- Rehabilitation including increasing the structural capacity of an existing pavement through the recycling of existing layers and/or addition of new granular layers or structural asphalt overlays more than 80mm thick. For gravel roads it is gravel layer more than 100mm thick. These rehabilitation activities are however limited to maximum of 25 per cent of the PRMG allocation

The PRMG cannot be allocated to the following projects:

- Improvements comprising works that aim to improve the quality of service on roads with an unacceptable quality of service. These include measures of improving quality of service on existing roads such as increases the width in selected areas (i.e. addition of climbing/passing lanes), increases in the width over the total length of the project i.e. addition of paved shoulder and localised geometric and intersection improvements. These activities could in some instances include complete rehabilitation of the existing pavement structure; and

- New Facilities comprising works that aim to improve network capacity and includes the upgrading of earth (dirt) road to an engineered gravel road, the upgrading of a gravel road to a surfaced road and upgrading of single carriageway road to 4-lane or dual carriageway road. The construction of new gravel or surfaced road where previously no road existed (brown/green fields construction). The construction of new bridge to replace existing bridge or new interchange to replace intersection.

The reporting responsibilities of the Department are to:

- Submit quarterly infrastructure reports to the National Department of Transport (NDoT) and the relevant provincial treasury that comply with the Infrastructure Reporting Model (IRM) and quarterly performance report templates thirty days after the end of each quarter;
- Report on the EPWP job creation data to NDoT and Department of Public Works on the EPWP reporting system;
- Report all infrastructure expenditure partially or fully funded by this grant on the IRM provided by National Treasury;
- Ensure projects are selected using RAMS as the primary source of information;
- Ensure ongoing stakeholder communication and engagement, regarding planning and implementation of road projects; and
- Ensure that approved PRMG funded projects are gazetted through the provincial legislative system and Provincial legislature

Table 12.1 shows the funding trends per source of funding from financial year 2014/15 to 2020/21.

Table 12.1: Vote 12 - Revenue source for Infrastructure

Funding Source (R Thousand)	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-Term Estimates		
	2014/15	2015/16	2016/17	2017/18			2018/19	2019/20	2020/2021
1. Equitable Share	4 658 505	4 839 827	4 784 041	4 984 123	5 209 369	5 209 369	5 204 891	5 521 057	5 851 641
2. Provincial Roads Maintenance Grant	1 788 158	1 779 255	1 925 378	1 828 970	1 828 970	1 828 970	1 826 745	1 772 792	1 870 031
3. Expanded Public Works Programme	59 443	55 602	56 055	33 645	33 645	33 645	76 562	-	-
Total	6 506 106	6 674 684	6 765 474	6 846 738	7 071 984	7 071 984	7 108 198	7 293 849	7 721 672

Table 12.2 categorises the infrastructure funding according the nature of investment from 2014/15 to 2020/21 financial years. The bulk of the infrastructure budget; at 74.5 percent of the infrastructure budget for 2018/19 financial year, is allocated to existing infrastructure assets which finances the following:

- Maintenance and repairs (35%);
- Upgrades and additions (25%); and
- Rehabilitation and refurbishment (14%).

New Infrastructure and non-infrastructure share the remaining 26 percent of the budget. The Department has no infrastructure transfers and there are no infrastructure leases. A similar pattern with regards to the allocation of the infrastructure budget is noticeable throughout the MTEF period.

The non-infrastructure budget at 16 percent of the budget throughout the MTEF period is inclusive of but not limited:

- Zibambele contractors – a road maintenance contract system which is a poverty alleviation programme;
- Mechanical associated budget intended for capital and operational expenditure; and
- Maintenance administration; in relation to infrastructure delivery, such as salaries for all regions and other overhead costs.

Table 12. 2: Vote 12 - Summary of provincial estimates by nature of investment

R thousand	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-term Estimates

3. Outlook for the 2018/19 MTEF Period

The Department had some of the projects completed and some currently in progress during the 2017/18. Some of these projects are listed below:

- Main Road P577, located from Duffs Road to KwaDabeka, comprising the construction of 16.5 kilometres. The project will be completed in the 2017/18 financial year. This project includes the Bus Rapid Transit (BRT) system which is being finalised in the same financial year;
- Main Road P700 corridor, located from Ulundi to Empangeni, comprising the upgrade of 93.5 kilometres from gravel to blacktop surface. To date; 84.5 kilometres is complete, with five kilometres of blacktop surface having been constructed during the period under review however line markings are expected to be finalised by the end of the financial year thereafter the road can be considered complete;
- Main Road P127, located from Impendle to Himeville, comprising the upgrade of 56 kilometres from gravel road to blacktop surface. To date; 32 kilometres have been upgraded, with three kilometres of this total having been upgraded in 2017/18, as planned;
- Main Road P443 which extends from the intersection with road P522/2 and P522/1, approximately 13km southwest of Pongola River in Ndumo and continues in south-westerly directions towards Ingwavuma near the Swaziland Border. The project entails the rehabilitation and upgrading of a 23.26km. This road forms part of the Inkululeko development program. The planned widening of shoulders, the blasting and widening of narrow sections, the construction of new base layer and a black top weatherproof surfacing of 8400m² was achieved during 2017/18;
- Mdloti River Bridge, located on Main Road P713 in the iLembe District Municipality which commenced in October 2016 was anticipated to be completed in 2017/18. However; due to poor performance by the contractor, the Department has commenced the process of terminating the contract; and
- Mboza Pongola Vehicle Bridge is a new bridge being constructed over the Pongola River. The bridge site is located in the uMhlabuyalingana Municipal area, in the Ingwavuma Rural Road Transport Forum (RRTF) under the uMkhanyakude District Municipality. The construction commenced towards the end of 2015/16 and completed during the year under review.

During the 2018/19 financial year, the department will continue with the prioritization of infrastructure upgrades and rehabilitation of the provincial road network to improve and optimise the lifespan of the provincial infrastructure network. The following are some of the projects that will be implemented in 2018/19 financial year:

- Main Road P700 corridor, located from Ulundi to Empangeni, comprising the upgrade of 93.5 kilometres from gravel to blacktop surface. To date, 79.5 kilometres have been completed. In 2018/19,

the department plans to construct a balance on 9.5 kilometres on Main Road P253 as part of P700 corridor;

- Main Road P127, located from Impendle to Himeville, comprising the upgrade of 56 kilometres from gravel road to blacktop surface. A total of 32 kilometres will have been upgraded by the end of the 2017/18 financial year;
- Main Road P318, located at the foot of the Drakensberg Mountains, under Dr Nkosazana Dlamini Zuma Municipality in Sani Pass, comprising the upgrade of 13.6 kilometres with 12 structures from gravel to blacktop surface. Department has advertised 11.4 kilometre contract which will be completed in 2019/20 financial year; and
- The construction of the uMzimkhulu Public Transport Facility is anticipated to commence in 2018/19 with completion anticipated in 2019/20. This is due to the delays in the appointment of a service provider that is envisaged to be finalised by the end of March 2018. The planning and design of the facility has been finalised.

The following are some of the upgrade projects that will be implemented in 2018/19 using Labour Intensive Construction (LIC) methods:

- District Road D1613, located in the key economic hub of Inanda, Ndwedwe and KwaMashu is comprising of 3.68 kilometres. An estimated 250 EPWP participants will be employed, with an impact on over 1000 people in the local community;
- Local Road L1578 to be upgraded from gravel to concrete is located in the Folweni area and comprises of 2.5 kilometres. An estimated 400 EPWP participants will be employed during the course of the works; and
- District Road D954 and Local Road L1099 are located in the Umzumbe area and collectively comprise of 7 kilometres. An estimated 100 EPWP participants will be employed during the course of the works, with a great positive impact upon the community.

Table 12.3 provides a geographic spread of the projects according to municipal districts. There are two projects funded by the EPWP that will be implemented throughout the province with allocated budget for 2018/19 at R266.958 million and 2019/20 at R108.420 million. The Umgungundlovu district has 113 projects valued at R2.857 billion, King Cetshwayo has 92 projects budgeted at R2.592 billion and Harry Gwala district has 70 projects budgeted at R2.574 billion over the MTEF period respectively. These are the most funded districts over the MTEF period. However; closely following these are UThukela at 91 projects and Zululand at 139 projects where in their allocated budgets are R2.374 billion and R2.309 billion respectively. The remaining districts have each been allocated budget below R2 billion over the MTEF with the least being Amajuba district with 32 projects and budget allocation of R1.220 billion.

Table 12. 3: Vote 12 - Infrastructure Estimates Allocations per Municipal District

District Municipality (R Thousand)	Number of Projects	2018/19	2019/20	2020/21
Ugu	48	581 676	596 240	473 804

Total	868	7 108 198	7 293 849	7 721 672

4. State of Readiness

Table 12.4 depicts the state of readiness to implement projects over the MTEF period. The categories are based on the IDMS gate system. The spread of budget in relation to the number of projects shows that the Department prioritises maintenance and repairs. There are 11 projects at initiation stage with budget allocation only in the 2020/21 financial year thus implying that the Department intends to focus on projects which are from design stages. This is further confirmed by the low number of projects and budget under the feasibility stage. Notably, 319 projects at various stages of construction with 21 percent of the budget allocation for 2018/19. Tender stage has 229 projects with 16 percent of budget allocation. There are 100 packaged projects which are primarily under maintenance and repairs and also under non-infrastructure. As a result, the bulk of the budget (52 percent) sits at the category of packaged ongoing projects. This is an indication that the Department seeks to maintain existing infrastructure assets over prioritising new infrastructure and this is highly commendable because failure to timeously maintain may have detrimental effects on road users and the road lifespan. By prioritising existing infrastructure, it directly impacts on budget optimisation.

Table 12. 4: Vote 12 - Shows the State of Readiness to Implement Projects

Project Status (R Thousand)	Number of Projects	2018/19	2019/20	2020/21

Social Development**1. Strategic Overview of Infrastructure Programme**

The Department's key focus is the enhancement of the quality of life of the people of KwaZulu-Natal. In this regard the department seeks to align its operations and strategic position with the overall aim of government to ensure a long and healthy life for all, as well as to create sustainable rural communities. The strategic objectives of the department include the provision adequate infrastructure to support social welfare services, children and families, restorative services, development and research; providing developmental social welfare services as well as community development services.

2. Funding of Infrastructure

The source of funding for all infrastructure projects for the department is mainly Equitable Share. In the 2017/ 18 MTEF the National Department of Social Development introduced an Early Childhood Development (ECD) grant for maintenance of community ECD facilities. The ECD grant is however not indicated as a revenue source for infrastructure development as this is mainly for minor building and maintenance improvements aimed at ensuring ECD centres comply with the health and safety norms and standards. These norms and standards as identified by the National Department of Social Development will be funded from this grant. The maximum value to be spent per ECD centre for maintenance improvements is R100, 000. The Department is required to conduct assessments of conditionally registered centres in order to qualify for maintenance grant funding in 2018/19. Table 13.1 reflects the revenue source for infrastructure. The decreasing trend in the Equitable Share allocation from 2014/15 up to 2017/18 is due to other Departmental pressures which led to cuts in the infrastructure budget to fund these pressures. A positive growth is however notable in the 2018/19 financial year and a further decline in the two outer years of the MTEF.

Table 13. 1: Vote 13 - Revenue source for infrastructure

Funding Source (R Thousand)	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-Term Estimates		
	2014/15	2015/16	2016/17	2017/18			2018/19	2019/20	2020/2021
1. Equitable Share	152 152	142 701	133 791	156 708	151 049	136 548	135 114	129 195	105 307
2. Infrastructure Conditional Grant	-	-	-	-	-	-	-	-	-
Total	152 152	142 701	133 791	156 708	151 049	136 548	135 114	129 195	105 307

Table 13.2 shows a summary of provincial estimates by nature of investment consisting of Existing infrastructure assets, Maintenance and repair, Upgrades and additions, Refurbishment and rehabilitation, New infrastructure assets. The figures fluctuate over a seven year period from 2014/15 to the 2018/19 MTEF due to various factors including fiscal consolidation and reprioritisation within the department. The department has experienced pressure relating to upgrading and renovating the state owned facilities in order to bring them to acceptable condition based on norms and standards. The increase in 2017/18 relates to the maintenance portion of the new ECD grant, and the department will review the allocation in-year. Some of the department's major projects include Newcastle School of Industries, Madadeni Rehabilitation centre and Chatsworth service office.

Table 13. 2: Vote 13 - Summary of provincial estimates by nature of investment

R thousand	Outcome			Main appropriation	Adjusted appropriation 2017/18	Revised estimate	Medium-term estimates

3. Outlook for the 2018/19

The outlook for the 2018/19 MTEF relates to the provision of office and residential accommodation for staff in rural areas, and construction of CDCs, ECD centres and secure care centres. This includes all the One-stop Development centres, as well as the Dambuza youth development centre. Maintenance projects include day-to-day maintenance, as well as reactive maintenance such as electrical faults, burst pipes, at the service offices and places of safety. The eThekweni Cluster office buildings (formerly known as the Government Garage building), will continue in 2017/18 as well as the Underberg service office. Table 13.3 show the infrastructure estimates per municipal district. eThekweni Metro has the highest number of projects at 18 and an estimated budget allocation of R 44 million in the financial year 2018/19. Uthukela district has 9 projects and an estimated budget of R 7 million for the 2018/19 financial year. Amajuba and Umkhanyakude districts have an equal number of 7 projects and an estimated budget of R 23 million and R 9 million respectively. The Ilembe and Harry Gwala districts have an equal number of 4 projects and an estimated budget of R 4 million and R5 million. There is 1 package of maintenance projects that is province wide.

Table 13. 3: Vote 13 - Infrastructure estimates allocations per Municipal District

District Municipality (R Thousand)	Number of Projects	2018/19	2019/20	2020/21
Amajuba	7	23 546	13 000	13 701

4. State of Readiness

Table 13.4 shows the state of readiness of the department to implement projects in the 2018/19 MTEF period. The department has a total of 72 projects at various stages. 15 projects are at identified stage, 6 projects in pre-feasibility stage, 9 projects in the feasibility stage, 5 projects in the design stage, 5 projects at tender stage, and 4 projects at site hand over to contractor. There department recorded 27 projects in construction stage. There are no projects at final completion stage. The largest portion of the budget in the 2018/19 financial year is allocated to projects in construction. The largest portion of the budget in the 2019/20 financial year is allocated to projects at design stage. In the financial year 2020/21 the largest portion of the budget is allocated to projects in identified, tender and feasibility stage.

Table 13. 4: Vote 13 - Shows the State of Readiness to Implement Project

Project Status (R Thousand)	Number of Projects	2018/19	2019/20	2020/21

Vote 14

Public Works

1. Strategic Overview of Infrastructure Programme

The Department of Public Works (DoPW) is the custodian of all state owned assets in the province and as such has the responsibility to ensure that provincial immovable asset policies, systems, plans and assessments are in place and updated. The department further manages the acquisitions, disposals, maintenance and operations of immovable assets for the Provincial Departments. In terms of acquisition of land it includes the facilitation of timeous access to services and resources [water supply, electricity, and telecommunications] with all relevant stakeholders.

DoPW performs Implementing Agent (IA) functions for the delivery of infrastructure projects (buildings) on behalf of the Provincial Departments and is referred to as the Implementing Department. This function includes activities such as scope definition for infrastructure projects, upgrades of and additions to existing infrastructure assets, renovation, refurbishment and rehabilitation of existing infrastructure assets, scheduled maintenance of existing infrastructure assets, day-to-day, routine and emergency repairs, and construction of new infrastructure assets. DoPW is also a user department where it is expected to build office accommodation for its own employees. This programme relates to the spending of the Department of Public Work's in terms of their own infrastructure.

2. Funding of Infrastructure

The source of funding for all infrastructure projects for the department is Equitable Share. There are no conditional grants for infrastructure projects that are for the department's own use. Table 14.1 reflects the revenue source for infrastructure. The high spending in 2014/15 when compared to 2015/16 was attributed to the once-off funding for the Richmond Community Development programme relating to ablution facilities in the Richmond area, which explains the decrease in 2015/16 and 2016/17. There is a general decrease in the Equitable Share allocation from the 2015/2016 financial year to the 2017/2018 MTEF period. The decrease in the allocation expected in the 2018/2019 financial year is due to fiscal consolidation. The table below reflects the infrastructure allocation for the DoPW and excludes budgets for projects implemented by the department on behalf of other sector departments.

Table 14. 1: Vote 14 - Revenue source for infrastructure

Funding Source (R Thousand)	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-Term Estimates		
	2014/15	2015/16	2016/17	2017/18			2018/19	2019/20	2020/2021
	1. Equitable Share	108 762	80 325	50 557	67 282	61 446	55 046	61 139	70 406
2. Infrastructure Conditional Grant	-	-	-	-	-	-	-	-	-
Total	108 762	80 325	50 557	67 282	61 446	55 046	61 139	70 406	71 506

Table 14.2 details a summary of provincial estimates by nature of investment consisting of Existing infrastructure assets, Maintenance and repair, Upgrades and additions, Refurbishment and rehabilitation, New infrastructure assets. The figures fluctuate over a period seven years due to various factors including fiscal consolidation and budget cuts due to financial pressures within the department such as the purchase of new computer equipment. The fluctuating trend over the 2018/19 MTEF is based on the department's actual capital infrastructure requirements including the construction of a new district office in iLembe, continuing with the construction of the canteen in the uMgungundlovu district office, as well as the construction of additional parking bays for the Southern region

Table 14. 2: Vote 14 - Summary of provincial estimates by nature of investment

3. Outlook for the 2018/19 MTEF Period

The department will continue in the 2018/2019 MTEF, to prioritise major projects, some of which are multi-year, including sound proofing of the Mayville Conference Centre and conversion of an existing building on the premises into a dining facility, new canteen in the uMgungundlovu district office, upgrades to the workshop in the Vryheid district office, the continuation of the construction of a new district office in iLembe, construction of new parking bays in the Southern regional offices, upgrades of existing sheds in the eThekweni regional office, upgrades of the Eshowe district office, space planning for the Ulundi office and construction of the new Construction Industry Development Board (CIDB) offices in Newcastle.

Table 14.3 show the infrastructure estimates per municipal district. There are 39 projects in Zululand district with a budget of R 10 million in 2018/19 and 24 projects in eThekweni with a budget of R 6 million in the same financial year. Umgungundlovu district has 19 projects with a budget of R 5 million in the 2018/19 financial year. The department is also planning for 16 projects throughout the province for the day to day maintenance of district offices and has budgeted R 15 million in the 2018/19 financial year. Ilembe district has the highest budget allocation in the 2018/19 financial year, and in the 2019/20 and 2020/21 financial years UMgungundlovu has the highest budget allocation with R 16 million and R 13 million respectively.

Table 14. 3: Vote 14 - Infrastructure Estimates per Municipal District

District Municipality (R Thousand)	Number of Projects	2018/19	2019/20	2020/21

Total	148	61 139	70 406	71 506

4. State of Readiness

Table 14.4 shows the state of readiness of the department to implement projects in the 2018/19 MTEF period. The department has a total of 148 projects at various stages of the project cycle. Of these 30 projects are at initiation stage, 3 in pre-feasibility stage, 1 in the feasibility stage, 6 projects in the design stage, 4 projects at tender stage, and 34 at site handover to contractor. The department recorded 50 projects in construction stage and 20 project in practical completion stage. The largest portion of the budget in 2018/19 financial year is allocated to projects at design stage. In the 2019/20 financial year projects at feasibility get the largest portion of the budget. In the 2020/21 financial year projects at construction stage get the largest portion of the budget.

Table 14. 4: Vote 14 - Shows the State of Readiness to Implement Project

Project Status (R Thousand)	Number of Projects	2018/19	2019/20	2020/21

Vote 15

Arts and Culture

1. Strategic Overview of Infrastructure Programme

The Department strategic direction related to the provision of integrated arts, culture and heritage services for the people of KwaZulu-Natal. This is achieved amongst others through the delivery of the infrastructure services ensuring access to the respective services.

There is a rapid infrastructure development of new libraries to increase access to library and information services. Physical maintenance and refurbishment of existing libraries making them more attractive spaces conducive for recreational and educational use.

2. Funding of Infrastructure

The infrastructure is funded through Equitable Share and Community Library Services Grant (CLSG). The Equitable Share decreases by R52.974 million from financial year 2018/19 to 2020/21 whereas the CLSG increases by R4.306 million over the MTEF period. The CLSG grant framework has the following conditions but not limited:

- Provinces may use a maximum of five per cent of the total amount allocated to them for capacity building and provincial management of the grant;
- The details of how these funds will be used must be included in the respective business plans;
- At least 20 per cent of the additional allocations must be used to establish dual purpose service points in collaboration with provincial departments of Basic Education. The detail of how these funds will be used by provinces must be included in their respective business plans;
- Service level agreements (SLAs) determining reporting protocols must be signed with receiving municipalities within two months after the 2016 Division of Revenue Act (DoRA) takes effect; and
- The SLAs must include financial commitments over the MTEF in addition to the payment schedules to municipalities and reporting protocols which outline measurable performance targets for each municipality

Table 15.1 below shows the funding trends per source of funding from financial year 2014/15 to 2020/21.

Table 15.1: Vote 15 - Revenue source for Infrastructure

Funding Source (R Thousand)	Audited Outcome			Main Appropriation	Adjusted Appropriation	Revised Estimate	Medium-Term Estimates		
	2014/15	2015/16	2016/17				2017/18		
1. Equitable Share	-	-	-	-	-	-	103 630	99 872	50 656
2. Community Library Services Grant	-	-	-	-	-	-	78 694	77 000	83 000
Total	-	-	-	-	-	-	182 324	176 872	133 656

The bulk of the infrastructure as indicated in table 15.2 is directed towards new infrastructure assets throughout the MTEF period.

3. Outlook for the 2018/19 MTEF Period

Some of the major projects budgeted for by the Department are as follows:

- Construction of the Archives Repository; and
- Upgrading of Osizweni Arts Centre

4. State of Readiness

Table 15.4 depicts the state of readiness to implement projects. These are 31 projects in total, 11 projects are at planning stage, 11 projects at tender stage and 3 projects are at construction stage.

Table 15. 3: Vote 15 - Shows the State of Readiness to Implement Projects

Conclusion

In general most department's focus is on the existing asset base which is commendable and regarded as a healthy budget split. There are departments that transfer to entities mainly for spending on new infrastructure are Economic Development, Tourism and Environmental Affairs and Sport and Recreation.

The annexures below show the list of projects per department which are planned to be implemented in the 2017/18 MTEF. The project lists indicates the name of each project and gives a brief detail e.g. the project status, the location, the estimated start and finish date and financial information of each project. It must be noted that some maintenance projects are clustered together into packages based on their nature and location but all capital projects are indicated as individual projects.

The Provincial Legislature will spend their infrastructure budget mainly on day-to-day maintenance, hence the list of projects is not included.

This publication will be an annual publication that will continue to evolve.
